SECTION 1 INTRODUCTION

A. PURPOSE

This document is a \square policy-level, \boxtimes project level Initial Study for evaluation of potential environmental impacts resulting with the proposed Parcel Map #02513 (Refer to Exhibit "A").

B. CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) REQUIREMENTS AND THE IMPERIAL COUNTY'S GUIDELINES FOR IMPLEMENTING CEQA

As defined by Section 15063 of the State California Environmental Quality Act (CEQA) Guidelines and Section 7 of the County's "CEQA Regulations Guidelines for the Implementation of CEQA, as amended", an **Initial Study** is prepared primarily to provide the Lead Agency with information to use as the basis for determining whether an Environmental Impact Report (EIR), Negative Declaration, or Mitigated Negative Declaration would be appropriate for providing the necessary environmental documentation and clearance for any proposed project.

	According to	Section	15065,	an EIR is	deemed	appropriate	for a particular	proposal	if the follo	wing	conditions
15	occur:										

- The proposal has the potential to substantially degrade the quality of the environment.
- The proposal has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.
- The proposal has possible environmental effects that are individually limited but cumulatively considerable.
- The proposal could cause direct or indirect adverse effects on human beings.

	ording to Section 15070(a), a Negative Declaration is deemed appropriate if the proposal w	ould r	not result
in a	ny significant effect on the environment.		

According to Section 15070(b), a **Mitigated Negative Declaration** is deemed appropriate if it is determined that though a proposal could result in a significant effect, mitigation measures are available to reduce these significant effects to insignificant levels.

This Initial Study has determined that the proposed applications will not result in any potentially significant environmental impacts and therefore, a Negative Declaration is deemed as the appropriate document to provide necessary environmental evaluations and clearance as identified hereinafter.

This Initial Study and Negative Declaration are prepared in conformance with the California Environmental Quality Act of 1970, as amended (Public Resources Code, Section 21000 et. seq.); Section 15070 of the State & County of Imperial's Guidelines for Implementation of the California Environmental Quality Act of 1970, as amended (California Code of Regulations, Title 14, Chapter 3, Section 15000, et. seq.); applicable requirements of the County of Imperial; and the regulations, requirements, and procedures of any other responsible public agency or an agency with jurisdiction by law.

Pursuant to the County of Imperial <u>Guidelines for Implementing CEQA</u>, depending on the project scope, the County of Imperial Board of Supervisors, Planning Commission and/or Planning Director is designated the Lead Agency, in accordance with Section 15050 of the CEQA Guidelines. The Lead Agency is the public agency which has the

principal responsibility for approving the necessary environmental clearances and analyses for any project in the County.

C. INTENDED USES OF INITIAL STUDY AND NEGATIVE DECLARATION

This Initial Study and Negative Declaration are informational documents which are intended to inform County of Imperial decision makers, other responsible or interested agencies, and the general public of potential environmental effects of the proposed applications. The environmental review process has been established to enable public agencies to evaluate environmental consequences and to examine and implement methods of eliminating or reducing any potentially adverse impacts. While CEQA requires that consideration be given to avoiding environmental damage, the Lead Agency and other responsible public agencies must balance adverse environmental effects against other public objectives, including economic and social goals.

The Initial Study and Negative Declaration, prepared for the project will be circulated for a period of 20 days (30-days if submitted to the State Clearinghouse for a project of area-wide significance) for public and agency review and comments. At the conclusion, if comments are received, the County Planning & Development Services Department will prepare a document entitled "Responses to Comments" which will be forwarded to any commenting entity and be made part of the record within 10-days of any project consideration.

D. CONTENTS OF INITIAL STUDY & NEGATIVE DECLARATION

This Initial Study is organized to facilitate a basic understanding of the existing setting and environmental implications of the proposed applications.

SECTION 1

I. INTRODUCTION presents an introduction to the entire report. This section discusses the environmental process, scope of environmental review, and incorporation by reference documents.

SECTION 2

II. ENVIRONMENTAL CHECKLIST FORM contains the County's Environmental Checklist Form. The checklist form presents results of the environmental evaluation for the proposed applications and those issue areas that would have either a potentially significant impact, potentially significant unless mitigation incorporated, less than significant impact or no impact.

PROJECT SUMMARY, LOCATION AND EVIRONMENTAL SETTINGS describes the proposed project entitlements and required applications. A description of discretionary approvals and permits required for project implementation is also included. It also identifies the location of the project and a general description of the surrounding environmental settings.

ENVIRONMENTAL ANALYSIS evaluates each response provided in the environmental checklist form. Each response checked in the checklist form is discussed and supported with sufficient data and analysis as necessary. As appropriate, each response discussion describes and identifies specific impacts anticipated with project implementation.

SECTION 3

- **III. MANDATORY FINDINGS** presents Mandatory Findings of Significance in accordance with Section 15065 of the CEQA Guidelines.
- IV. PERSONS AND ORGANIZATIONS CONSULTED identifies those persons consulted and involved in

preparation of this Initial Study and Negative Declaration.

V. REFERENCES lists bibliographical materials used in the preparation of this document.

VI. NEGATIVE DECLARATION - COUNTY OF IMPERIAL

VII. FINDINGS

SECTION 4

VIII. RESPONSE TO COMMENTS (IF ANY)

IX. MITIGATION MONITORING & REPORTING PROGRAM (MMRP) (IF ANY)

E. SCOPE OF ENVIRONMENTAL ANALYSIS

For evaluation of environmental impacts, each question from the Environmental Checklist Form is summarized and responses are provided according to the analysis undertaken as part of the Initial Study. Impacts and effects will be evaluated and quantified, when appropriate. To each question, there are four possible responses, including:

- 1. **No Impact:** A "No Impact" response is adequately supported if the impact simply does not apply to the proposed applications.
- 2. **Less Than Significant Impact**: The proposed applications will have the potential to impact the environment. These impacts, however, will be less than significant; no additional analysis is required.
- 3. **Potentially Significant Unless Mitigation Incorporated:** This applies where incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact".
- 4. **Potentially Significant Impact:** The proposed applications could have impacts that are considered significant. Additional analyses and possibly an EIR could be required to identify mitigation measures that could reduce these impacts to less than significant levels.

F. POLICY-LEVEL or PROJECT LEVEL ENVIRONMENTAL ANALYSIS

This Initial Study and Negative Declaration will be conducted under a \square policy-level, \bowtie project level analysis. Regarding mitigation measures, it is not the intent of this document to "overlap" or restate conditions of approval that are commonly established for future known projects or the proposed applications. Additionally, those other standard requirements and regulations that any development must comply with, that are outside the County's jurisdiction, are also not considered mitigation measures and therefore, will not be identified in this document.

G. TIERED DOCUMENTS AND INCORPORATION BY REFERENCE

Information, findings, and conclusions contained in this document are based on incorporation by reference of tiered documentation, which are discussed in the following section.

1. Tiered Documents

As permitted in Section 15152(a) of the CEQA Guidelines, information and discussions from other documents can be included into this document. Tiering is defined as follows:

"Tiering refers to using the analysis of general matters contained in a broader EIR (such as the one prepared

for a general plan or policy statement) with later EIRs and negative declarations on narrower projects; incorporating by reference the general discussions from the broader EIR; and concentrating the later EIR or negative declaration solely on the issues specific to the later project."

Tiering also allows this document to comply with Section 15152(b) of the CEQA Guidelines, which discourages redundant analyses, as follows:

"Agencies are encouraged to tier the environmental analyses which they prepare for separate but related projects including the general plans, zoning changes, and development projects. This approach can eliminate repetitive discussion of the same issues and focus the later EIR or negative declaration on the actual issues ripe for decision at each level of environmental review. Tiering is appropriate when the sequence of analysis is from an EIR prepared for a general plan, policy or program to an EIR or negative declaration for another plan, policy, or program of lesser scope, or to a site-specific EIR or negative declaration."

Further, Section 15152(d) of the CEQA Guidelines states:

"Where an EIR has been prepared and certified for a program, plan, policy, or ordinance consistent with the requirements of this section, any lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR or negative declaration on the later project to effects which:

- (1) Were not examined as significant effects on the environment in the prior EIR; or
- (2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means."

2. Incorporation By Reference

Incorporation by reference is a procedure for reducing the size of EIRs/MND and is most appropriate for including long, descriptive, or technical materials that provide general background information, but do not contribute directly to the specific analysis of the project itself. This procedure is particularly useful when an EIR or Negative Declaration relies on a broadly-drafted EIR for its evaluation of cumulative impacts of related projects (*Las Virgenes Homeowners Federation v. County of Los Angeles* [1986, 177 Ca.3d 300]). If an EIR or Negative Declaration relies on information from a supporting study that is available to the public, the EIR or Negative Declaration cannot be deemed unsupported by evidence or analysis (*San Francisco Ecology Center v. City and County of San Francisco* [1975, 48 Ca.3d 584, 595]). This document incorporates by reference appropriate information from the "Final Environmental Impact Report and Environmental Assessment for the "County of Imperial General Plan EIR" prepared by Brian F. Mooney Associates in 1993 and updates.

When an EIR or Negative Declaration incorporates a document by reference, the incorporation must comply with Section 15150 of the CEQA Guidelines as follows:

- The incorporated document must be available to the public or be a matter of public record (CEQA Guidelines Section 15150[a]). The General Plan EIR and updates are available, along with this document, at the County of Imperial Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.
- This document must be available for inspection by the public at the office of the lead agency (CEQA Guidelines Section 15150[b]). These documents are available at the County of Imperial Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.
- These documents must summarize the portion of the document being incorporated by reference or briefly

describe information that cannot be summarized. Furthermore, these documents must describe the relationship between the incorporated information and the analysis in the tiered documents (CEQA Guidelines Section 15150[c]). As discussed above, the tiered EIRs address the entire project site and provide background and inventory information and data which apply to the project site. Incorporated information and/or data will be cited in the appropriate sections.

- These documents must include the State identification number of the incorporated documents (CEQA Guidelines Section 15150[d]). The State Clearinghouse Number for the County of Imperial General Plan EIR is SCH #93011023.
- The material to be incorporated in this document will include general background information (CEQA Guidelines Section 15150[f]). This has been previously discussed in this document.

II. Environmental Checklist

- Project Title: Carson Kalin Parcel Map #02513/Initial Study #24-0042
- 2. Lead Agency: Imperial County Planning & Development Services Department
- 3. Contact person and phone number: Luis Valenzuela, Planner II, (442)265-1736, ext. 1749
- 4. Address: 801 Main Street, El Centro CA, 92243
- 5. E-mail: luisvalenzuela@co.imperial.ca.us
- Project location: 5815 Lack Road, Westmorland, CA 92281, Assessor's Parcel Number (APN) 020-170-001, -002, -003, & -004.
- 7. Project sponsor's name and address: Carson Kalin P.O. Box 1234, Brawley, CA 92227
- 8. General Plan designation: Agriculture
- 9. **Zoning**: A-3 (Heavy Agriculture)
- 10. **Description of project**: The applicant, Carson Kalin, seeks approval for a minor subdivision which consists of dividing four (4) existing parcels into six (6) separate legal parcels. All parcels are located on Lack Road between Walker Road and Hoskins Road, in the County of Imperial, California. The proposed minor subdivision will not change the total 487.81 acres of the four parcels.

The subject properties are described as being: Lot 5 and the East Half of the Southwest Quarter of Section 31 containing 123.98 Acres, Lot 6 of Section 31 containing 43.94 acres, the Southeast Quarter of Section 31 containing 160.00 Acres, and the South half of the Northeast Quarter, the Southeast Quarter of the Northwest Quarter, Lot 4 of section 31 containing 163.92 Acres, all being in T12S., R13E., S.B.B.M. The purpose of the proposed parcel map is to divide the current agricultural fields into distinct legal parcels.

Proposed Parcel 1 will have legal and physical access from Hoskins Road, will continue to receive water from the Trifolium Lateral Nine Canal Delivery #180-B, and will continue to drain to the Trifolium Ten Drain. There is no proposed development on Parcel 1 nor any changes in water delivery. Proposed Parcel 1 size is 81.26 acres.

Proposed Parcel 2 will have legal and physical access from Lack Road, will continue to receive water from the Trifolium Eight Canal Delivery #156, and will continue to drain to the Trifolium Nine Drain. There is no proposed development on Parcel 2 nor any changes in water delivery. Proposed Parcel 2 size is 79.06 acres.

Proposed Parcel 3 will have legal and physical access from Hopskins Road, will continue to receive water from the Trifolium Lateral Nine Canal Delivery #180-A, and will continue to drain to the Trifolium Ten Drain. There is no proposed development on Parcel 3 nor any changes in water delivery. Proposed Parcel 3 size is 106.39 acres.

Proposed Parcel 4 will have legal and physical access from Lack Road, will continue to receive water from the Trifolium Lateral Eight Canal Delivery #155-A, and will continue to drain to the Trifolium Nine Drain. There is no proposed development on Parcel 4 nor any changes in water delivery. Proposed Parcel 4 size is 58.64 acres.

Proposed Parcel 5 will have legal and physical access from Hoskins Road and Walker Road, will continue to receive water from the Trifolium Lateral Nine Canal; Delivery #180, and will continue to drain to the Trifolium ten drain. There is no proposed development on Parcel 5 or any changes in water delivery. Proposed Parcel 5 size is 78.71 acres.

Proposed Parcel 6 will have legal and physical access from Lack Road and Walker Road, will continue to receive water from the Trifolium Lateral eight canal delivery #155, and will continue to drain to the trifolium nine drain. There is no proposed development on parcel 6 or any changes in water delivery. Proposed Parcel 6 size is 75.89 acres.

- 11. **Surrounding land uses and setting**: The project is bounded by Walker Road on the West, Lack Road on the East, and Hoskins Road on the South. The property is also known as Assessor's Parcel Number (APN) 020-170-001-000, -002, -003 & -004. The project is surrounded by parcels all zoned as A-3 (Heavy Agricultural) on the North, East, West and A-2(General Agriculture) on the South.
- **12. Other public agencies whose approval is required** (e.g., permits, financing approval, or participation agreement.): Planning Commission.

13. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentially, etc.?

Consultation letters were sent to the Quechan and Campo Band of Mission Indian Tribes on January 28, 2025. No comments have been received to this date.

Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code, Section 21080.3.2). Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code, Section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code, Section 21082.3 (c) contains provisions specific to confidentiality.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

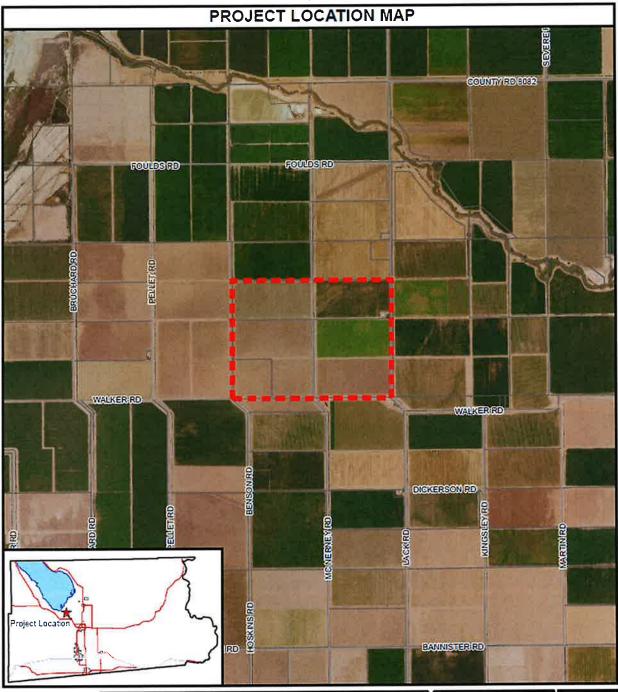

The environmental factors checked below would be	be potentially affected by this project, involving at least one	impact
that is a "Potentially Significant Impact" as indicate

PROJECT SUMMARY

- A. Project Location: The proposed project is located at 5815 Lack Road, Westmorland, CA 92281; Assessor's Parcel Number (APN) 020-170-001, -002, -003 and -004.
- **B. Project Summary**: The applicant, Carson Kalin, proposes a minor subdivision of land to separate four (4) existing agriculture fields into six (6) legal parcels. The reasoning behind the proposed parcel map is to separate the existing separately farmed fields into legal parcels. The existing four parcels are approximately 487.81 acres together.
- C. Environmental Setting: The proposed project parcels are relatively flat, located approximately 3 miles north of the City of Westmorland, and are bounded by parcels zoned as A-3 (Heavy Agricultural) on the North, West, East, and parcels zoned as A-2 (General Agricultural) on the South.
- D. Analysis: Under the Land Use Element of the Imperial County General Plan, the project site is designated as "Agriculture." It is classified as A-3 (Heavy Agriculture) per Zone Map #47 of the Imperial County Land Use Ordinance (Title 9). Initial Study #24-0042 will analyze any impacts related to the proposed project. The proposed minor subdivision proposes (6) six parcels: proposed Parcel 1 with approximately ±84.09 Acres, proposed Parcel 2 with approximately ±80.16.22 Acres, proposed Parcel 3 with approximately ±82.64 acres, proposed Parcel 4 with approximately ±79.08 acres, proposed Parcel 5 with approximately ±85.13 acres, and proposed Parcel 6 with approximately ±80.74 acres which complies with Section 90805.00 et. al. of the Imperial County Land Use Ordinance (Title 9). All six parcels are to remain in agricultural use.
- E. General Plan Consistency: Per the Imperial County General Plan, the land use designation for this project is "Agriculture" and zoned as A-3 (Heavy Agriculture) per Zone Map #47 of the Imperial County Land Use Ordinance (Title 9). The proposed project is consistent with the General Plan and County Land Use Ordinance, Section 90805.00, since no change is being proposed to the existing "Agriculture" designation. The proposed parcels meet the minimum lot size of the A-3 (Heavy Agriculture) zone, section 90509.04.

Exhibit "A" Vicinity Map

CARSON KALIN PM02513/IS24-0042 APN 020-170-001,-002,-003,-004-000

EVALUATION OF ENVIRONMENTAL IMPACTS:

- A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - Earlier Analysis Used, Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and,
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance

No Impact Incorporated Impact Impact (PSI) (LTSMI) (LTSI) (NI) I. AESTHETICS Except as provided in Public Resources Code Section 21099, would the project: Have a substantial adverse effect on a scenic vista or scenic M highway? a) Four areas within the County have the potential as state-designated scenic highways; however, the project site is not located near any scenic vista or scenic highway according to the Imperial County General Plan Circulation and Scenic Highway Element¹ and California State Scenic Highway System Map². No impacts are expected. Substantially damage scenic resources, including, but not M limited to trees, rock outcroppings, and historic buildings within a state scenic highway? b) As previously stated on section (I)(a), the proposed project is not located near a scenic vista or scenic highway and would not substantially damage any scenic resources. The nearest highway is State Highway 86 (CA-SH 86) located immediately south of the Project site. This highway is not a designated scenic highway. The nearest eligible state scenic highway according to Caltrans California State Scenic Highway System Map is State Route 78 (CA-SR 78), located 2.7 miles south of the Project site. The project vicinity does not contain any rock outcroppings and has very few trees. Additionally, according to the California Historic Resources3 in Imperial County, the nearest eligible historic building is the Site of Fort Romualdo Pacheco which is located approximately 18.5 miles southeast of the project site. Therefore, no substantial damage to scenic resources, including, but not limited to trees, rock outcropping, and historic buildings within a state scenic highway is anticipated. No impacts are expected. In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surrounding? (Public views are those that are experienced 冈 from publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality? c) The proposed project is for a minor subdivision within an existing agriculture field area, which consists of dividing four existing parcels into six distinct parcels. The proposed action would not substantially or physically degrade the existing visual character or quality of public views of the site and its surroundings since the existing zoning designation is proposed to remain. No impacts are expected. Create a new source of substantial light or glare which would \boxtimes adversely affect day or nighttime views in the area? d) The proposed minor subdivision does not include any substantial source of nighttime light in the project's vicinity since no development is being proposed. No impacts are expected. AGRICULTURE AND FOREST RESOURCES II. In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. --Would the project: Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps 冈 prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nona) The proposed project is for a minor subdivision within an existing agriculture field area which consists of dividing four existing parcels into six distinct parcels. According to the California Farmland Mapping & Monitoring Program: Imperial County Important Farmland 2022 Map4, the proposed project site is classified as prime farmland. Additionally, the proposed action would not convert any type of Prime Farmland, Unique Farmland, or Farmland of Statewide Importance to nonagricultural use. No impacts are expected. Conflict with existing zoning for agricultural use, or a X Williamson Act Contract?

VII.	GE	OLOGY AND SOILS Would the project:				
	a)	Directly or indirectly cause potential substantial adve effects, including risk of loss, injury, or death involving: a) The proposed project is for a minor subdivision whi Although the latest Alquist-Priolo Earthquake Fault Z California Department of Conservation Fault Activity N Imperial County Seismic and Public Safety Element I Elmore Ranch Fault at approximately 8.5 miles west	ch consists of divid coning Map from the Map ¹¹ , United States Figure 1 – "Seismid	e California Geologica Geological Survey's Q : Activity in Imperial C	l Survey Hazard uaternary Faults County Map, ^{13a} "	Program ¹⁰ , Map ¹² , and identify the

No Impact Impact Incorporated Impact (LTSMI) (LTSI) (NI) (PSI) subjected to compliance with the latest edition of the California Building Code¹⁴ as well as to go through a ministerial building permit review. Adherence and compliance with these standards and regulations would bring any impact to less than significant levels. Rupture of a known earthquake fault, as delineated on the most recent Alguist-Priolo Earthquake Fault Zoning \boxtimes Map issued by the State Geologist for the area or based П on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42? 1) As previously stated under item (VII)(a) above, although the latest Alquist-Priolo Earthquake Fault Zoning Map from the California Geological Survey Hazard Program¹⁰, California Department of Conservation Fault Activity Map¹¹, United States Geological Survey's Quaternary Faults Map12, and Imperial County Seismic and Public Safety Element Figure 1 - "Seismic Activity in Imperial County Map, 13a" identify the Elmore Ranch Fault at approximately 8.5 miles west of the proposed project site, any new future development would be subjected to compliance with the latest edition of the California Building Code¹⁴ as well as to go through a ministerial building permit review. Adherence and compliance with these standards and regulations would bring any impact to less than significant levels. Strong Seismic ground shaking? 2) The proposed minor subdivision site is located in the seismically active Imperial Valley of southern California with numerous mapped faults traversing the region including the San Andreas, San Jacinto, and Elsinore Fault Zones in southern California¹³. As previously stated on item (VII)(a)(1) above, the proposed project is located approximately 8.5 miles west of the Elmore Ranch Fault, indicating seismic ground shaking is expected. Adherence to the latest edition of the California Building Code and as well as to go through a ministerial building permit review would bring any impact to less than significant levels, should any construction be proposed. As previously mentioned in sections (VII)(a) and (VII)(a)(1), any new development would be subjected to compliance with the latest edition of the California Building Code¹⁴ as well as to go through a ministerial building permit review. Adherence and compliance with these standards and regulations would bring any impact to less than significant levels. Seismic-related ground failure, including liquefaction and seiche/tsunami? 3) The proposed project is for a minor subdivision which consists of dividing four existing parcels into six distinct parcels; and is not located within a seiche/tsunami area per the California Tsunami Hazard Area Map16. Less than significant impacts are expected. Landslides? 4) According to Imperial County General Plan's Seismic and Public Safety Element 13, "Landslide Activity Map 13b" - Figure 2 and the California Geological Survey Landslide Map17, the proposed project site is not located within the immediate vicinity of a landslide activity area. The hazard of land sliding is unlikely due to the regional planar topography; however, any new future development would be subject to compliance with the latest edition of the California Building Code¹⁴ as well as to go through a ministerial building permit review. Therefore, less than significant impacts are expected. Result in substantial soil erosion or the loss of topsoil? b) The proposed project is for a minor subdivision which does not include changes to the existing topography. Additionally, according to Imperial County General Plan's Seismic and Public Safety Element,13 "Erosion Activity Map13c"-Figure 3, the proposed project is not located within the immediate vicinity of a substantial soil erosion area. Any impacts are expected to be less than significant. Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the project, and potentially result in on- or off-site landslides, lateral spreading, subsidence, liquefaction or collapse? c) As previously discussed in sections (VII)(3) and (VII)(4), the proposed minor subdivision's risk for on- or off-site landslide, lateral spreading, subsidence, or collapse is expected to be less than significant. Additionally, any new future developments would be subjected to compliance with the latest edition of the California Building Code¹⁴ as well as to go through a ministerial building permit review. Adherence and compliance with these standards and regulations would bring any impact to less than significant levels. Be located on expansive soil, as defined in the latest Uniform Building Code, creating substantial direct or indirect risk to life

or property?

IX.	HA	ZARDS AND HAZARDOUS MATERIALS Would the project	et:			
	a)	Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? a) The proposed minor subdivision does not expect to create not involve the handling of any hazardous materials. No improvements to the control of the contro	a significant ha	azard to the public or t	he environmer	⊠ nt as it does
	b)	Create a significant hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment? b) The proposed project does not expect to create a signifforeseeable upset and accident conditions involving the releamaterials are anticipated as part of the project. No impacts a	icant hazard to	the public or enviror	ment through	reasonably o hazardous
	c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?				\boxtimes

Incorporated Impact No Impact Impact (LTSI) (PSI) (LTSMI) (NI) c) The proposed minor subdivision does not anticipate the emitting of hazardous emissions, or the handling of hazardous or acutely hazardous materials, substance, or waste as previously stated on items (IX)(a) and (IX)(b) above. Additionally, the project site is not located within a 1/4 mile of any schools. The nearest school in the vicinity is the Westmorland Elementary School in the City of Westmorland, located approximately 4.5 miles southeast of the proposed project site; therefore, it would not represent a risk to educational facilities. No impacts are expected. Be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code \boxtimes Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? d) The proposed project is not located on a site included on a list of hazardous materials sites according to California Department of Toxic Substances Control EnviroStor²³ and Figure 5 - "Hazardous Material Sites Map^{13e}" from the Imperial County General Plan: Seismic and Public Safety Element¹³; therefore, no impacts are expected. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public X airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area? e) The proposed minor subdivision is not located within an airport land use plan per Imperial County Airport Land Use Compatibility Maps²⁴. The nearest airport in the area is the Calipatria Airport located approximately 8 miles northeast of the project site; therefore, it would not result in or create a significant hazard or excessive noise for people residing or working in the project area. No impacts are expected. Impair implementation of or physically interfere with an \boxtimes adopted emergency response plan or emergency evacuation plan? f) The proposed minor subdivision would not interfere with an adopted emergency response plan or emergency evacuation plan. The applicant will meet any requirements requested by the Fire/OES Department. Adherence to ICFD standards should bring any impacts to less than significant. Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires? g) According to CalFire's "Fire Hazard Severity Zones in Local Responsibility Areas – Imperia County Map²⁵" effective April 1, 2024, the proposed project site is designated as Local Responsibility Area (LRA) Unzoned; therefore, the proposed project would not expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildfires. Additionally, as previously discussed in section (IX)(f), the applicant would meet any requirements as set forth by the Imperial County Fire/OES Department. Compliance with the Imperial County Fire Department (ICFD) standards, requirements, and recommendations would bring any impact to less than significant. X. HYDROLOGY AND WATER QUALITY Would the project: Violate any water quality standards or waste discharge \Box requirements or otherwise substantially degrade surface or ground water quality? a) The proposed minor subdivision would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality. Additionally, according to the minor subdivision application, water and sewer to the newly created parcels would be provided via the existing Trifolium Lateral Eight & Nine Canal Delivery for water and will continue to drain to the Trifolium Nine & Ten Drains. Any impacts are expected to be less than significant. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project \boxtimes may impede sustainable groundwater management of the basin? b) As previously stated on item (X)(a) above, the proposed minor subdivision does not expect to substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin. Less than significant impacts are expected. Substantially alter the existing drainage pattern of the site or \boxtimes area, including through the alteration of the course of a stream

XVIII. TRIBAL CULTURAL RESOURCES Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, \Box \boxtimes П П cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place or object with cultural value to a California Native American tribe, and a) According to the Imperial County General Plan's Conservation and Open Space Element⁶, Figure 6^{6e}, the proposed project site is not located within any known Native American cultural sensitivity area. Additionally, the Quechan and Campo Band of Mission Indian Tribes, as well as Torres Martinez have requested to be consulted under Assembly Bill 52. Consultation letters were sent to the Quechan and Campo Band of Mission Indian Tribes on January 28, 2025. No comments have been received from the Quechan and Campo Band of Mission Indians Tribe for this project to this date. Therefore, less than significant impacts are expected. (i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of 冈 П historical resources as define in Public Resources Code Section 5020.1(k), or (i) According to the California Historic Resources³ in Imperial County, the proposed project site is not listed or seem to be eligible under the Public Resources Code Section 21074 or 5020.1 (k); therefore, any impacts are expected to be less than significant. (ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section \boxtimes In applying the criteria set forth is subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American Tribe. (ii) No significant resources listed as defined in the Public Resources Code Section 5024.1 are expected to be impacted by the proposed minor subdivision. Additionally, as previously discussed in item (XVIII)(a) above, AB 52 Consultation letters were sent to the Quechan and Campo Band of Mission Indian Tribes on January 28, 2025. No comments have been received from the Quechan and Campo Band of Mission Indians Tribe for this project to this date. Less than significant impacts are expected. XIX. UTILITIES AND SERVICE SYSTEMS Would the project: Require or result in the relocation or construction of new or a) expanded water, wastewater treatment or stormwater \boxtimes drainage, electric power, natural gas, or telecommunications facilities, the construction of which could cause significant environmental effects? a) The proposed project is for a minor subdivision which consists of dividing four existing parcels into six distinct parcels. Additionally, it does not expect or result in the relocation or construction of new expanded water, wastewater treatment or stormwater drainage, electric power, natural gas or telecommunication facilities, the construction of which could cause significant environmental effects. Any impacts are expected to be less than significant. Have sufficient water supplies available to serve the project П from existing and reasonably foreseeable future development during normal, dry and multiple dry years? b) Accordant to the project's application, water and sewer to both newly created parcels would be provided via the existing

Trifolium Lateral Nine Canal Delivery. Therefore, sufficient water supplies are available to serve the project from existing and

SECTION 3

III. MANDATORY FINDINGS OF SIGNIFICANCE

The following are Mandatory Findings of Significance in accordance with Section 15065 of the CEQA Guidelines.

a)	Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal, eliminate tribal cultural resources or eliminate important examples of the major periods of California history or prehistory?		
b)	Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)		
c)	Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?

VI. NEGATIVE DECLARATION – County of Imperial

The following Negative Declaration is being circulated for public review in accordance with the California Environmental Quality Act Section 21091 and 21092 of the Public Resources Code.

Project Name: Parcel Map #02513

Project Applicant: Carson Kalin

Project Location: 5815 Lack Road, Westmorland, CA 92281

Description of Project: The applicant, Carson Kain, seeks approval for a minor subdivision which consists of dividing four (4) existing parcels into six (6) separate legal parcels. All parcels are located on Lack Road, in the County of Imperial, California. The subject properties are described as being: Lot 5 and the East Half of the Southwest Quarter of Section 31 containing 123.98 Acres, Lot 6 of Section 31 containing 43.94 acres, The Southeast Quarter of Section 31 containing 160.00 Acres, and the South Half of the Northeast Quarter, the Southeast Quarter of the Northwest Quarter, Lot 4 of Section 31 containing 163.92 Acres, all being in T12S., R13E., S.B.B.M. The reason behind the proposed parcel map is to separate the existing separately farmed fields into legal parcels.

VII. **FINDINGS** This is to advise that the County of Imperial, acting as the lead agency, has conducted an Initial Study to determine if the project may have a significant effect on the environment and is proposing this Negative Declaration based upon the following findings: The Initial Study shows that there is no substantial evidence that the project may have a significant effect on the environment and a NEGATIVE DECLARATION will be prepared. The Initial Study identifies potentially significant effects but: Proposals made or agreed to by the applicant before this proposed Mitigated Negative Declaration (1)was released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur. There is no substantial evidence before the agency that the project may have a significant effect on (2)the environment. Mitigation measures are required to ensure all potentially significant impacts are reduced to levels of (3)insignificance. A MITIGATED NEGATIVE DECLARATION will be prepared. If adopted, the Negative Declaration means that an Environmental Impact Report will not be required. Reasons to support this finding are included in the attached Initial Study. The project file and all related documents are available for review at the County of Imperial, Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 (442) 265-1736. NOTICE The public is invited to comment on the proposed Negative Declaration during the review period. Jim Minnick, Director of Planning & Development Services Date of Determination

The Applicant hereby acknowledges and accepts the results of the Environmental Evaluation Committee (EEC) and

hereby agrees to implement all Mitigation Measures, if applicable, as outlined in the MMRP.

- (B) The required construction is a necessary prerequisite to the orderly development of the surrounding area.
- (b) If the subdivider elects to omit all or a portion of any unit of improved or unimproved land which is not divided for the purpose of sale, lease, or financing, the omitted portion shall not be counted as a parcel for purposes of determining whether a parcel or final map is required, and the fulfillment of construction requirements for offsite improvements, including the payment of fees associated with any deferred improvements, shall not be required until a permit or other grant of approval for development is issued on the omitted parcel, except where allowed pursuant to paragraph (2) of subdivision (a).
- (c) The provisions of subdivisions (a) and (b) providing for deferral of the payment of fees associated with any deferred improvements shall not apply if the designated remainder or omitted parcel is included within the boundaries of a benefit assessment district or community facilities district.
- (d) A designated remainder or any omitted parcel may subsequently be sold without any further requirement of the filing of a parcel map or final map, but the local agency may require a certificate of compliance or conditional certificate of compliance.

[Amended, Chapter 907, Statutes of 1991]

CHAPTER 2 MAPS

ARTICLE 1 GENERAL PROVISIONS

66425 Application of Chapter

The necessity for tentative, final and parcel maps shall be governed by the provisions of this chapter.

66426 Necessity of Tentative and Final Maps

A tentative and final map shall be required for all subdivisions creating five or more parcels, five or more condominiums as defined in Section 783 of the Civil Code, a community apartment project containing five or more parcels, or for the conversion of a dwelling to a stock cooperative containing five or more dwelling units, except where any one of the following occurs:

- (a) The land before division contains less than five acres, each parcel created by the division abuts upon a maintained public street or highway, and no dedications or improvements are required by the legislative body.
- (b) Each parcel created by the division has a gross area of 20 acres or more and has an approved access to a maintained public street or highway.
- (c) The land consists of a parcel or parcels of land having approved access to a public street or highway, which comprises part of a tract of land zoned for industrial or commercial development, and which has the approval of the governing body as to street alignments and widths.
- (d) Each parcel created by the division has a gross area of not less than 40 acres or is not less than a quarter of a quarter section.
 - (e) The land being subdivided is solely for the creation of an environmental subdivision pursuant to Section 66418.2.
 - (f) A parcel map shall be required for those subdivisions described in subdivisions (a), (b), (c), (d), and (e).

[Amended, Chapter 76, Statutes of 2003]

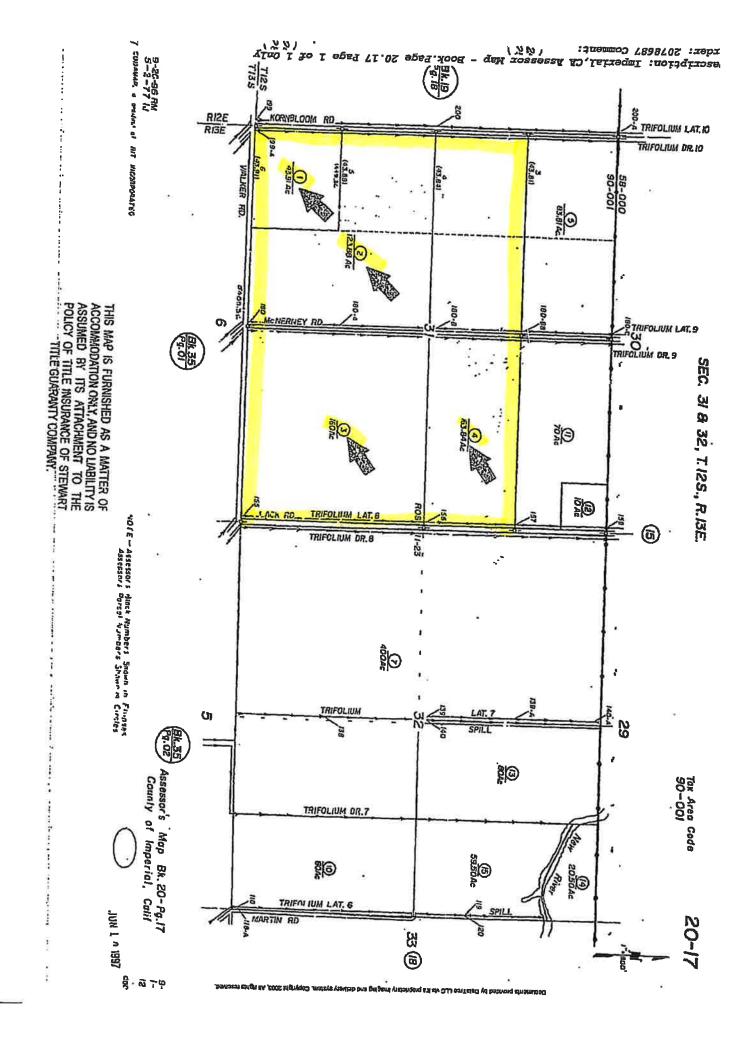

66426.5 Conveyances to Governmental Agencies, Public Entities or Public Utilities for Rights-of-Way; Computing Number of Parcels

Any conveyance of land to or from a governmental agency, public entity, public utility or subsidiary of a public utility, for conveyance to that public utility for rights-of-way shall not be considered a division of land for purposes of computing the number of parcels. For purposes of this section, any conveyance of land to or from a governmental agency shall include a fee interest, a leasehold interest, an easement, or a license.

[Amended, Chapter 382, Statutes of 2011]

66427 Map of Condominium, Community Apartment Project, Stock Cooperative Project; Three-Dimensional Portions

(a) A map of a condominium project, a community apartment project, or of the conversion of five or more existing dwelling units to a stock cooperative project need not show the buildings or the manner in which the buildings or the airspace above the property shown on the map are to be divided, nor shall the governing body have the right to refuse approval of a parcel, tentative, or final map of the project on account of the design or the location of buildings on the

NOTICE TO APPLICANT

SUBJECT: PAYMENT OF FEES

Dear Applicant:

Pursuant to County Codified Ordinance Division 9, Chapter 1, Section 90901.02, all Land Use Applications must be submitted with their appropriate application fee. Failure to comply will cause application to be rejected.

Please note that once the Department application is received and accepted, a "time track" billing will commence immediately. Therefore, should you decide to cancel or withdraw your project at any time, the amount of time incurred against your project will be billed and deducted from your payment. As a consequence, if you request a refund pursuant to County Ordinance, your refund, if any, will be the actual amount paid minus all costs incurred against the project.

Please note there will be no exceptions to this policy. Thank you for your attention.

Sincerely yours,

im Minnick, Director

Nanning & Development Services

RECEIVED BY: Camm. Kah DATE: 12/10/24

IMPERIAL COUNTY PLANNING & DEVELOPMENT SERVICES GENERAL INDEMNIFICATION AGREEMENT

As part of this application, applicant and real party in interest, if different, agree to defend, indemnify, hold harmless, and release the County of Imperial ("County"), its agents, officers, attorneys, and employees (including consultants) from any claim, action, or proceeding brought against any of them, the purpose of which is to attack, set aside, void, or annul the approval of this application or adoption of the environmental document which accompanies it. This indemnification obligation shall include, but not be limited to, damages, costs, expenses, attorney fees, or expert witness fees that may be asserted by any person or entity, including the applicant, arising out of or in connection with the approval of this application, whether or not there is concurrent negligence on the part of the County, its agents, officers, attorneys, or employees (including consultants).

If any claim, action, or proceeding is brought against the County, its agents, officers, attorneys, or employees (including consultants), to attack, set aside, void, or annul the approval of the application or adoption of the environmental document which accompanies it, then the following procedures shall apply:

- The Planning Director shall promptly notify the County Board of Supervisors of any claim, action or proceeding brought by an applicant challenging the County's action. The County, its agents, attorneys and employees (including consultants) shall fully cooperate in the defense of that action.
- 2. The County shall have the final determination on how to best defend the case and will consult with applicant regularly regarding status and the plan for defense. The County will also consult and discuss with applicant the counsel to be used by County to defend it, either with in-house counsel, or by retaining outside counsel provided that the County shall have the final decision on the counsel retained to defend it. Applicant shall be fully responsible for all costs incurred. Applicant shell be entitled to provide his or her own counsel to defend the case, and said independent counsel shall work with County Counsel to provide a joint defense.

Parcel Map

Kalin - Willey Ranch

Project Description

The Parcel Map consists of four separate legal parcels. The Assessor Parcel Numbers are: 020-170-001, -002, -003, and -004. All parcels are located on Walker Road between Lack Road and Hoskins Road, in the County of Imperial, California.

The subject properties are described as being: Lot 5 and the East Half of the Southwest Quarter of Section 31 containing 123.98 Acres, Lot 6 of Section 31 containing 43.94 Acres, The Southeast Quarter of Section 31 containing 160.00 Acres, and the South Half of the Northeast Quarter, The Southeast Quarter of the Northwest Quarter, Lot 4 of Section 31 containing 163.92 Acres, all being in T.12S., R.13E., S.B.M.

The reasoning behind the proposed parcel map is to separate the existing separately farmed fields into legal parcels.

Proposed Parcel 1 will have legal and physical access from Hoskins Road, will continue to receive water from the Trifolium Lateral Nine Canal Delivery #180-B, and will continue to drain to the Trifoulium Ten Drain. There is no proposed development on Parcel 1 or any changes in water delivery.

Proposed Parcel 2 will have legal and physical access from Lack Road, will continue to receive water from the Trifolium Lateral Eight Canal Delivery #156, and will continue to drain to the Trifoulium Nine Drain. There is no proposed development on Parcel 2 or any changes in water delivery.

Proposed Parcel 3 will have legal and physical access from Hoskins Road, will continue to receive water from the Trifolium Lateral Nine Canal Delivery #180-A, and will continue to drain to the Trifoulium Ten Drain. There is no proposed development on Parcel 3 or any changes in water delivery.

Proposed Parcel 4 will have legal and physical access from Lack Road, will continue to receive water from the Trifolium Lateral Eight Canal Delivery #155-A, and will continue to drain to the Trifoulium Nine Drain. There is no proposed development on Parcel 4 or any changes in water delivery.

Proposed Parcel 5 will have legal and physical access from Hoskins Road and Walker Road, will continue to receive water from the Trifolium Lateral Nine Canal Delivery #180, and will continue to drain to the Trifoulium Ten Drain. There is no proposed development on Parcel 5 or any changes in water delivery.

Proposed Parcel 6 will have legal and physical access from Lack Road and Walker Road, will continue to receive water from the Trifolium Lateral Eight Canal Delivery #155, and will continue to drain to the Trifoulium Nine Drain. There is no proposed development on Parcel 6 or any changes in water delivery.

SUBJECT:

Parcel Map 02513 - Carson Kalin

Dear Mr. Minnick:

The Imperial County Air Pollution Control District (Air District) would like to thank you for the opportunity to review and comment on Parcel Map (PM) 02513 (Project). The project is located at 5815 Lack Rd and proposes separating four existing parcels into 6 legal parcels. The existing parcels are identified with Assessor's Parcel Numbers 020-170-001, -002, -003, & -004 and are approximately 43.94, 123.98, 160, & 163.92 acres respectively. The proposed parcels are identified as Parcels 1, 2, 3, 4, 5, & 6 and have a proposed size of 84.09, 80.16, 82.64, 79.08, 85.13, & 80.74 acres respectively. There are no proposed developments or changes to water delivery with the project.

The Air District reminds the applicant that the project and any future developments must comply with all Air District Rules & Regulations and would emphasize Regulation VIII – Fugitive Dust Rules, a collection of rules designed to maintain fugitive dust emissions below 20 % visual opacity.

Finally, the Air District requests a copy of the finalized map for its records.

For your convenience, all Air District rules and regulations can be accessed online at https://apcd.imperialcounty.org/rules-and-regulations. Should you have any questions or concerns please feel free to contact the Air District by calling our office at (442) 265-1800.

Respectfully,

mael Garcia

Luis Valenzuela, Planner II

SUBJECT:

PM 2513 Carson Kalin.

Located at 5815 Lack Rd, Westmorland, CA 92281.

APN's 020-170-001, 002, 003 & 004.

Dear Mr. Minnick:

This letter is in response to your submittal received on January 27, 2025, for the above-mentioned project. The applicant proposes to separate existing farmed fields into 6 legal parcels.

Department staff has reviewed the package information and the following comments:

- 1. Provide a Parcel Map prepared by a California Licensed Land Surveyor or Civil Engineer and submit to the Department of Public Works, for review and recordation. The Engineer must be licensed in the category required by the California Business & Professions Code.
- 2. The Parcel Map shall be based upon a field survey. The basis of bearings for the Parcel Map shall be derived from the current epoch of the California Coordinate System (CCS), North America Datum of 1983 (NAD83). The survey shall show connections to a minimum of two (2) Continuously Operating Reference Stations (CORS) of the California Real Time Network (CRTN).
- 3. Provide tax certificate from the Tax Collector's Office prior to recordation of the Parcel Map.
- 4. Provide original Subdivision Guarantee, no older than six (6) months, prior to recordation of the Parcel Map.
- 5. Each parcel created or affected by this map shall abut a maintained road and/or have legal and physical access to a public road or access through common ownership.
- 6. The applicant shall provide an Irrevocable Offer of Dedication (IOD) or dedicate the required portion for sufficient right of way for future development of **Walker Rd**, being classified as **Major Collector Collector with four (4) lanes**, requiring **eighty-four (84)** feet of right of way, being forty-two (42) feet from the existing centerline. It is required that sufficient right of way be provided to meet this road classification. (As directed by Imperial County Board of

Supervisors per Minute Order #6 dated 11/22/1994 per the Imperial County Circulation Element Plan of the General Plan).

- 7. The applicant shall provide an Irrevocable Offer of Dedication (IOD) or dedicate the required portion for sufficient right of way for future development of Mc Nerney Rd, being classified as Local Roads / Residential two (2) lanes, requiring sixty (60) feet of right of way, being thirty (30) feet from the existing centerline. It is required that sufficient right of way be provided to meet this road classification. (As directed by Imperial County Board of Supervisors per Minute Order #6 dated 11/22/1994 per the Imperial County Circulation Element Plan of the General Plan).
- 8. The applicant shall provide an Irrevocable Offer of Dedication (IOD) or dedicate the required portion for sufficient right of way for future development of Lack Rd, being classified as Minor Collector Local Collector two (2) lanes, requiring seventy (70) feet of right of way, being thirty-five (35) feet from the existing centerline. It is required that sufficient right of way be provided to meet this road classification. (As directed by Imperial County Board of Supervisors per Minute Order #6 dated 11/22/1994 per the Imperial County Circulation Element Plan of the General Plan).
- 9. Applicant shall furnish a Drainage and Grading Plan to provide for property grading and drainage control, which shall also include prevention of sedimentation of damage to off-site properties. Said plan shall be completed per the Engineering Design Guidelines Manual for the Preparation and Checking of Street Improvement, Drainage, and Grading Plans within Imperial County. The Drainage and Grading Plan shall be submitted to this department for review and approval. The developer shall implement the approved plan. Employment of the appropriate Best Management Practices (BMP's) shall be included.
- 10. Any activity and/or work within Imperial County right-of-way shall be completed under a permit issued by this Department (encroachment permit) as per Chapter 12.12 EXCAVATIONS ON OR NEAR A PUBLIC ROAD of the Imperial County Ordinance.
- 11. Any permanent structures shall be located outside of the ultimate County Right-of-Way.
- 12. Should any structures be developed in the future, street improvements will be required as per Imperial County Ordinance: 12.10.020 Street Improvement Requirements.

Respectfully,

John A. Gay, PE Director of Public Works

Since 1911

February 11, 2025

Mr. Luis Valenzuela Planner II Planning & Development Services Department County of Imperial 801 Main Street El Centro, CA 92243

SUBJECT: Carson Kalin Minor Subdivision; PM02513

Dear Mr. Valenzuela:

On Janaury 27, 2025, the Imperial Irrigation District received from the Imperial County Planning & Development Services Department, a request for agency comments on a parcel map No. 02513. The applicant, Carson Kalin, proposes to subdivide existing farm fields into six (6) legal parcels. The fields are located at 5815 Lack Road, Westmorland, CA 92281 (APNs 020-170-001 and -002 through -004).

The Imperial Irrigation District has reviewed the information and has the following comments:

- 1. IID water facilities that may be impacted include the Trifolium Lateral 8, Trifolium Lateral 9, Trifolium Lateral 10, Trifolium Drain 8, Trifolium Drain 9, and Trifolium Drain 10.
- 2. The applicant should be advised to establish a point of water delivery and drainage discharge for each agricultural parcel. For additional information on water service the proponent may call and coordinate with IID's North End Division Office at (760) 482-9900.
- 3. The applicant will be required to provide and bear all costs associated with acquisition of land, rights of way, easements, and infrastructure relocations and realignments deemed necessary to accommodate any future project sited on the resulting parcels. street or road improvements imposed by the local governing authority. Any street or road improvements imposed by the local governing authority shall also be at the project proponent cost.
- 4. The applicant will be required to provide rights of ways and easements for any power line extensions and/or any other infrastructure needed to serve any future project(s) sited in the resulting parcels as well as the necessary access to allow for continued operation and maintenance of any IID facilities located on adjoining properties where no public access exists.
- 5. Any construction or operation on IID property or within its existing and proposed right of way or easements including but not limited to: surface improvements such as proposed new streets, driveways, parking lots, landscape; and all water, sewer, storm water, or any other above ground or underground utilities; will require an encroachment permit, or encroachment agreement (depending on the circumstances). A copy of the IID encroachment permit application and instructions for its completion are available at

https://www.iid.com/about-iid/department-directory/real-estate. The IID Real Estate Section should be contacted at (760) 339-9239 for additional information regarding encroachment permits or agreements.

- 6. In addition to IID's recorded easements, IID claims, at a minimum, a prescriptive right of way to the toe of slope of all existing canals and drains. Where space is limited and depending upon the specifics of adjacent modifications, the IID may claim additional secondary easements/prescriptive rights of ways to ensure operation and maintenance of IID's facilities can be maintained and are not impacted and if impacted mitigated. Thus, IID should be consulted prior to the installation of any facilities adjacent to IID's facilities. Certain conditions may be placed on adjacent facilities to mitigate or avoid impacts to IID's facilities
- 7. Any new, relocated, modified or reconstructed IID facilities required for and by the project (which can include but is not limited to electrical utility substations, electrical transmission and distribution lines, water deliveries, canals, drains, etc.) need to be included as part of the project's CEQA and/or NEPA documentation, environmental impact analysis and mitigation. Failure to do so will result in postponement of any construction and/or modification of IID facilities until such time as the environmental documentation is amended and environmental impacts are fully analyzed. Any and all mitigation necessary as a result of the construction, relocation and/or upgrade of IID facilities is the responsibility of the project proponent.
- 8. When the project goes through the CEQA compliance process, it is important to bear in mind that to address the project impacts to the electrical utility (i.e., the IID electrical grid), considered under the environmental factor "Utilities and Services" of the Environmental Checklist/Initial Study, to determine if the project would require or result in the relocation or construction of new or expanded electric power facilities, the construction or relocation of which could cause significant environmental effects; a circuit study/distribution impact study, facility study, and/or system impact study must be performed.

Should you have any questions, please do not hesitate to contact me at 760-482-3609 or at dvargas@iid.com. Thank you for the opportunity to comment on this matter.
