SECTION 1 INTRODUCTION

A. PURPOSE

This document is a policy-level, project level Initial Study for evaluation of potential environmental impacts resulting with the proposed Conditional Use Permit #24-0003 for a Special Event Center (Refer to Exhibit "A" & "B").

B. CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) REQUIREMENTS AND THE IMPERIAL COUNTY'S GUIDELINES FOR IMPLEMENTING CEQA

As defined by Section 15063 of the State California Environmental Quality Act (CEQA) Guidelines and Section 7 of the County's "CEQA Regulations Guidelines for the Implementation of CEQA, as amended", an **Initial Study** is prepared primarily to provide the Lead Agency with information to use as the basis for determining whether an Environmental Impact Report (EIR), Negative Declaration, or Mitigated Negative Declaration would be appropriate for providing the necessary environmental documentation and clearance for any proposed project.

According to Section 15065, an **EIR** is deemed appropriate for a particular proposal if the following conditions occur:

- The proposal has the potential to substantially degrade quality of the environment.
- The proposal has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.
- The proposal has possible environmental effects that are individually limited but cumulatively considerable.
- The proposal could cause direct or indirect adverse effects on human beings.

According to Section 15070(a), a **Negative Declaration** is deemed appropriate if the proposal would not result in any significant effect on the environment.

According to Section 15070(b), a **Mitigated Negative Declaration** is deemed appropriate if it is determined that though a proposal could result in a significant effect, mitigation measures are available to reduce these significant effects to insignificant levels.

This Initial Study has determined that the proposed applications will not result in any potentially significant environmental impacts and therefore, a Negative Declaration is deemed as the appropriate document to provide necessary environmental evaluations and clearance as identified hereinafter.

This Initial Study and Negative Declaration are prepared in conformance with the California Environmental Quality Act of 1970, as amended (Public Resources Code, Section 21000 et. seq.); Section 15070 of the State & County of Imperial's Guidelines for Implementation of the California Environmental Quality Act of 1970, as amended (California Code of Regulations, Title 14, Chapter 3, Section 15000, et. seq.); applicable requirements of the County of Imperial; and the regulations, requirements, and procedures of any other responsible public agency or an agency with jurisdiction by law.

Pursuant to the County of Imperial Guidelines for Implementing CEQA, depending on the project scope, the County of Imperial Board of Supervisors, Planning Commission and/or Planning Director is designated the Lead Agency,

in accordance with Section 15050 of the CEQA Guidelines. The Lead Agency is the public agency which has the principal responsibility for approving the necessary environmental clearances and analyses for any project in the County.

C. INTENDED USES OF INITIAL STUDY AND NEGATIVE DECLARATION

This Initial Study and Negative Declaration are informational documents which are intended to inform County of Imperial decision makers, other responsible or interested agencies, and the general public of potential environmental effects of the proposed applications. The environmental review process has been established to enable public agencies to evaluate environmental consequences and to examine and implement methods of eliminating or reducing any potentially adverse impacts. While CEQA requires that consideration be given to avoiding environmental damage, the Lead Agency and other responsible public agencies must balance adverse environmental effects against other public objectives, including economic and social goals.

The Initial Study and Negative Declaration, prepared for the project will be circulated for a period of 20 days (*30-days if submitted to the State Clearinghouse for a project of area-wide significance*) for public and agency review and comments. At the conclusion, if comments are received, the County Planning & Development Services Department will prepare a document entitled "Responses to Comments" which will be forwarded to any commenting entity and be made part of the record within 10-days of any project consideration.

D. CONTENTS OF INITIAL STUDY & NEGATIVE DECLARATION

This Initial Study is organized to facilitate a basic understanding of the existing setting and environmental implications of the proposed applications.

SECTION 1

I. INTRODUCTION presents an introduction to the entire report. This section discusses the environmental process, scope of environmental review, and incorporation by reference documents.

SECTION 2

II. ENVIRONMENTAL CHECKLIST FORM contains the County's Environmental Checklist Form. The checklist form presents results of the environmental evaluation for the proposed applications and those issue areas that would have either a potentially significant impact, potentially significant unless mitigation incorporated, less than significant impact or no impact.

PROJECT SUMMARY, LOCATION AND ENVIRONMENTAL SETTINGS describes the proposed project entitlements and required applications. A description of discretionary approvals and permits required for project implementation is also included. It also identifies the location of the project and a general description of the surrounding environmental settings.

ENVIRONMENTAL ANALYSIS evaluates each response provided in the environmental checklist form. Each response checked in the checklist form is discussed and supported with sufficient data and analysis as necessary. As appropriate, each response discussion describes and identifies specific impacts anticipated with project implementation.

SECTION 3

III. MANDATORY FINDINGS presents Mandatory Findings of Significance in accordance with Section 15065 of the CEQA Guidelines.

IV. PERSONS AND ORGANIZATIONS CONSULTED identifies those persons consulted and involved in preparation of this Initial Study and Negative Declaration.

V. REFERENCES lists bibliographical materials used in preparation of this document.

VI. NEGATIVE DECLARATION – COUNTY OF IMPERIAL

VII. FINDINGS

SECTION 4

VIII. RESPONSE TO COMMENTS (IF ANY)

IX. MITIGATION MONITORING & REPORTING PROGRAM (MMRP) (IF ANY)

E. SCOPE OF ENVIRONMENTAL ANALYSIS

For evaluation of environmental impacts, each question from the Environmental Checklist Form is summarized and responses are provided according to the analysis undertaken as part of the Initial Study. Impacts and effects will be evaluated and quantified, when appropriate. To each question, there are four possible responses, including:

1. **No Impact:** A "No Impact" response is adequately supported if the impact simply does not apply to the proposed applications.
2. **Less Than Significant Impact:** The proposed applications will have the potential to impact the environment. These impacts, however, will be less than significant; no additional analysis is required.
3. **Potentially Significant Unless Mitigation Incorporated:** This applies where incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact".
4. **Potentially Significant Impact:** The proposed applications could have impacts that are considered significant. Additional analyses and possibly an EIR could be required to identify mitigation measures that could reduce these impacts to less than significant levels.

F. POLICY-LEVEL or PROJECT LEVEL ENVIRONMENTAL ANALYSIS

This Initial Study and Negative Declaration will be conducted under a policy-level, project level analysis. Regarding mitigation measures, it is not the intent of this document to "overlap" or restate conditions of approval that are commonly established for future known projects or the proposed applications. Additionally, those other standard requirements and regulations that any development must comply with, that are outside the County's jurisdiction, are also not considered mitigation measures and therefore, will not be identified in this document.

G. TIERED DOCUMENTS AND INCORPORATION BY REFERENCE

Information, findings, and conclusions contained in this document are based on incorporation by reference of tiered documentation, which are discussed in the following section.

1. Tiered Documents

As permitted in Section 15152(a) of the CEQA Guidelines, information and discussions from other documents can be included into this document. Tiering is defined as follows:

"Tiering refers to using the analysis of general matters contained in a broader EIR (such as the one prepared for a general plan or policy statement) with later EIRs and negative declarations on narrower projects; incorporating by reference the general discussions from the broader EIR; and concentrating the later EIR or negative declaration solely on the issues specific to the later project."

Tiering also allows this document to comply with Section 15152(b) of the CEQA Guidelines, which discourages redundant analyses, as follows:

"Agencies are encouraged to tier the environmental analyses which they prepare for separate but related projects including the general plans, zoning changes, and development projects. This approach can eliminate repetitive discussion of the same issues and focus the later EIR or negative declaration on the actual issues ripe for decision at each level of environmental review. Tiering is appropriate when the sequence of analysis is from an EIR prepared for a general plan, policy or program to an EIR or negative declaration for another plan, policy, or program of lesser scope, or to a site-specific EIR or negative declaration."

Further, Section 15152(d) of the CEQA Guidelines states:

"Where an EIR has been prepared and certified for a program, plan, policy, or ordinance consistent with the requirements of this section, any lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR or negative declaration on the later project to effects which:

- (1) Were not examined as significant effects on the environment in the prior EIR; or
- (2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means."

2. Incorporation By Reference

Incorporation by reference is a procedure for reducing the size of EIRs/MND and is most appropriate for including long, descriptive, or technical materials that provide general background information, but do not contribute directly to the specific analysis of the project itself. This procedure is particularly useful when an EIR or Negative Declaration relies on a broadly-drafted EIR for its evaluation of cumulative impacts of related projects (*Las Virgenes Homeowners Federation v. County of Los Angeles* [1986, 177 Ca.3d 300]). If an EIR or Negative Declaration relies on information from a supporting study that is available to the public, the EIR or Negative Declaration cannot be deemed unsupported by evidence or analysis (*San Francisco Ecology Center v. City and County of San Francisco* [1975, 48 Ca.3d 584, 595]). This document incorporates by reference appropriate information from the "Final Environmental Impact Report and Environmental Assessment for the "County of Imperial General Plan EIR" prepared by Brian F. Mooney Associates in 1993 and updates.

When an EIR or Negative Declaration incorporates a document by reference, the incorporation must comply with Section 15150 of the CEQA Guidelines as follows:

- The incorporated document must be available to the public or be a matter of public record (CEQA Guidelines Section 15150[a]). The General Plan EIR and updates are available, along with this document, at the County of Imperial Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.
- This document must be available for inspection by the public at an office of the lead agency (CEQA Guidelines Section 15150[b]). These documents are available at the County of Imperial Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.

-
- These documents must summarize the portion of the document being incorporated by reference or briefly describe information that cannot be summarized. Furthermore, these documents must describe the relationship between the incorporated information and the analysis in the tiered documents (CEQA Guidelines Section 15150[c]). As discussed above, the tiered EIRs address the entire project site and provide background and inventory information and data which apply to the project site. Incorporated information and/or data will be cited in the appropriate sections.
 - These documents must include the State identification number of the incorporated documents (CEQA Guidelines Section 15150[d]). The State Clearinghouse Number for the County of Imperial General Plan EIR is SCH #93011023.
 - The material to be incorporated in this document will include general background information (CEQA Guidelines Section 15150[f]). This has been previously discussed in this document.

II. *Environmental Checklist*

1. **Project Title:** Grand Vista Event Center LLC
2. **Lead Agency:** Imperial County Planning & Development Services Department
3. **Contact person and phone number:** Derek Newland, Planner III, (442)265-1736, ext. 1756
4. **Address:** 801 Main Street, El Centro CA, 92243
5. **E-mail:** dereknewland@co.imperial.ca.us
6. **Project location:** 4097 Hwy 86 (SR-86), Brawley, CA 92227
APN #040-420-020-001
7. **Project sponsor's name and address:** Grand Vista Event Center LLC
4097 Hwy 86 (SR-86), Brawley, CA 92227
8. **General Plan designation:** Agriculture
9. **Zoning:** A-2 (General Agriculture)
10. **Description of project:** The applicant Grand Vista Ranch, LLC proposes a special event center located on approximately 7 acres on the southern portion of an approximately 13 acres parcel. The project expects to host up to 300 guests per event for up to 59 events per year consisting of weddings, birthday parties, fundraisers and other similar private events. The project proposes to hold events in outdoor and indoor settings with the outdoor events utilizing pop-up shades/tents and indoor events are proposed to be held in 2 proposed barns which are to be phased in based on the success of the initial outdoor event phase. The event center may supply tables, tablecloths, chairs, dishes, utensils, decorations and entertainment as needed. Events will have varying start times but will end at 12 am and clean up after the event is expected to be completed within 2 days following the event.

Waste disposal for events will be done through adequate trashcans which will be removed by a commercial waste hauler and wastewater would be through portable lavatories which will be pumped out by a licensed septage hauler. The project site will be fully covered with Bermuda grass to control fugitive dust due to foot and vehicle traffic.
11. **Surrounding land uses and setting:** The project is located approximately 4,000 feet southwest of the City of Brawley and is bounded by agricultural fields on all sides as well as Austin Road and the Central Main Canal to the west and Hwy 86 to the east. There is a house approximately 350 feet north of the project parcel and approximately 1,000 feet north of the edge of the proposed 7 acres special event center area.
12. **Other public agencies whose approval is required** (e.g., permits, financing approval, or participation agreement.): Imperial County Air Pollution Control District, Imperial County Public Works, Imperial County Fire Department, Imperial County Division of Environmental Health, Caltrans, Planning Commission
13. **Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentially, etc.? AB 52 Opportunity to Consult letters were sent to the Quechan and Campo Band of Mission Indians tribes on April 05, 2024, and no comments have been received to date from either**

Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code, Section 21080.3.2). Information may also be available from the

California Native American Heritage Commission's Sacred Lands File per Public Resources Code, Section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code, Section 21082.3 (c) contains provisions specific to confidentiality.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

<input type="checkbox"/> Aesthetics	<input type="checkbox"/> Agriculture and Forestry Resources	<input type="checkbox"/> Air Quality
<input type="checkbox"/> Biological Resources	<input type="checkbox"/> Cultural Resources	<input type="checkbox"/> Energy
<input type="checkbox"/> Geology /Soils	<input type="checkbox"/> Greenhouse Gas Emissions	<input type="checkbox"/> Hazards & Hazardous Materials
<input type="checkbox"/> Hydrology / Water Quality	<input type="checkbox"/> Land Use / Planning	<input type="checkbox"/> Mineral Resources
<input type="checkbox"/> Noise	<input type="checkbox"/> Population / Housing	<input type="checkbox"/> Public Services
<input type="checkbox"/> Recreation	<input type="checkbox"/> Transportation	<input type="checkbox"/> Tribal Cultural Resources
<input type="checkbox"/> Utilities/Service Systems	<input type="checkbox"/> Wildfire	<input type="checkbox"/> Mandatory Findings of Significance

ENVIRONMENTAL EVALUATION COMMITTEE (EEC) DETERMINATION

After Review of the Initial Study, the Environmental Evaluation Committee has:

Found that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

Found that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

Found that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

Found that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

Found that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Date:

PROJECT SUMMARY

A. Project Location: The project is located at 4097 Us Hwy 86, Brawley, Ca 92227. The parcel is identified as Assessor's Parcel Number 040-420-020 and is legally described as POR TR 106 14-13/14 16AC SE OF CENTRAL MAIN EXC POR IN HWY 86, S.B.B.M., in the unincorporated area of the County of Imperial.

B. Project Summary: The applicant Grand Vista Ranch, LLC proposes a special event center located on approximately 7 acres on the southern portion of an approximately 13 acres parcel. The project expects to host up to 300 guests per event for up to 59 events per year consisting of weddings, birthday parties, fundraisers and other similar private events. The project proposes to hold events in outdoor and indoor settings with the outdoor events utilizing pop-up shades/tents and indoor events are proposed to be held in 2 proposed barns which are to be phased in based on the success of the initial outdoor event phase. The event center may supply tables, tablecloths, chairs, dishes, utensils, decorations and entertainment as needed. Events will have varying start times but will end at 12 am and clean up after the event is expected to be completed within 2 days following the event. Waste disposal for events will be done through adequate trashcans which will be removed by a commercial waste hauler and wastewater would be through portable lavatories which will be pumped out by a licensed septage hauler. The project site will be fully covered with Bermuda grass to control fugitive dust due to foot and vehicle traffic.

C. Environmental Setting: The project parcel is 13 acres with the project site encompassing the southern 7 acres and located approximately 4,000 feet southwest of the City of Brawley and is bounded by agricultural fields on all sides as well as Austin Road and the Central Main Canal to the west and Hwy 86 to the east. There is a house approximately 350 feet north of the project parcel and approximately 1,000 feet north of the edge of the proposed 7 acres special event center area.

D. Analysis: The proposed project area is located within the County's General Plan designation of "Agriculture." The project site is currently zoned A-2 under the County Land Use Ordinance, Section 90508.00. The proposed project could be found consistent with the County Land Use Ordinance, specifically, Section 90508.02 "Uses Permitted Only with a Conditional Use Permit" for a "Special Occasion Facility".

E. General Plan Consistency: The project is designated as "Agriculture" within the General Plan and would be an allowed use within this designation with an approved Conditional Use Permit.

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance

Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

I. AESTHETICS

Except as provided in Public Resources Code Section 21099, would the project:

- a) Have a substantial adverse effect on a scenic vista or scenic highway?

a) The proposed special event center is located on Hwy 86 (SR-86) which is not designated as or eligible to be designated as, a scenic highway per the Imperial County General Plan Circulation and Scenic Highway Element¹ and California State Scenic Highway System Map². Therefore, the proposed project is not anticipated to have a substantial adverse effect on a scenic vista or scenic highway. No impacts are expected.
- b) Substantially damage scenic resources, including, but not limited to trees, rock outcroppings, and historic buildings within a state scenic highway?

b) As stated in I(a), the project is not located on or near a designated or eligible to be designated scenic highway and therefore, is not expected to substantially damage scenic resources, including, but not limited to trees, rock outcroppings, and historic buildings within a state scenic highway. No impacts are expected.
- c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surrounding? (Public views are those that are experienced from publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

c) The proposed project is a special event center that would consist initially of pop-up shade structures with future development proposing the construction of two barns, one proposed as 58' x 90' (5,220 sq ft) and the other proposed as 36' x 51' (1,836 sq ft), for indoor events. The project location is along the Hwy 86 banked curve just south of Brawley, Ca and contains an existing house on the north end of the property. The project is surrounded by agriculture fields on all sides and bounded between Hwy 86 and the Central Main Canal and Austin Road run parallel with each other. As the project consists of temporary pop-up shade structures and barns which would not be out of place in the agricultural area, the project is not expected to substantially degrade the existing visual character or quality of public views of the site and its surroundings and the project would not conflict with any applicable zoning or other regulations governing scenic quality as a special event center is an allowed use in the A-2 (General Agriculture) with an approved Conditional Use Permit. Any impacts would be considered less than significant.
- d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

d) The proposed special event center proposes having events at night with ending times varying but no later than 12 am. Lighting for these events would be required but would only be during event times and would be required and conditioned within the CUP, to be directed away or shielded from shining towards Hwy 86 and Austin Rd so as not to create a hazard to traffic as well as directed away and shielded from adjacent properties. It is expected that lighting and glare condition within the CUP would bring any impacts from light or glare affecting day or nighttime views in the area to less than significant levels. Per the California Department of Fish and Wildlife comment letter dated September 26, 2024³, artificial nighttime lighting may have potential impacts to surrounding potential habitat land and recommends the following mitigation.

MM BIO-[A]: Artificial Nighttime Light

During Project construction and the lifetime operations of the Project, the County and Project proponent shall eliminate all nonessential lighting throughout the Project area and avoid or limit the use of artificial light at night during the hours of dawn and dusk when many wildlife species are most active. The County and Project proponent shall ensure that lighting for Project activities is shielded, cast downward and directed away from surrounding open-space and agricultural areas, reduced in intensity to the greatest extent possible, and does not result in lighting trespass including glare into surrounding areas or upward into the night sky (see the International Dark-Sky Association standards at <http://darksky.org/>). The County and Project proponent shall ensure use of LED lighting with a correlated color temperature of 3,000 Kelvins or less, proper disposal of hazardous waste, and recycling of lighting that contains toxic compounds with a qualified recycler.

It is expected to compliance with this mitigation measure would bring any impacts to less than significant.

¹ Imperial County General Plan Circulation and Scenic Highway Element

³ California Department of Fish and Wildlife comment letter dated September 26, 2024

Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

II. **AGRICULTURE AND FOREST RESOURCES**

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. --Would the project:

- a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

a) The proposed special event center will be located on property that also contains an existing residence on the north portion of the property and is zoned A-2 (General Agriculture). The property is not farmed and is currently seeded with bermuda grass and is not expected to be farmed in the future. Additionally, per the California Department of Conservation: Farmland Mapping & Monitoring Program online application⁴ the property is designated as "Other Land". Therefore, the project would not convert Prime Farmland, Unique Farmland, Farmland of Statewide Importance as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use. No impacts are expected.
- b) Conflict with existing zoning for agricultural use, or a Williamson Act Contract?

b) There are no current Williamson Act Contracts in Imperial County. The proposed special event center would not conflict with existing zoning as a special event center is allowed within the A-2 zone with an approved Conditional Use Permit (CUP). No impacts are expected.
- c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?

c) The proposed project site is zoned for general agriculture use and therefore, the proposed special event center would not conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g)) as the proposed project would be an allowed use in the current A-2 zone with an approved CUP. No impacts are expected.
- d) Result in the loss of forest land or conversion of forest land to non-forest use?

d) As stated in II (a, b, & c) the project is zoned A-2 (General Agriculture) and is not farmed nor does it contain forest land. Therefore, the project would not result in the loss of forest land or conversion of forest land to non-forest use. No impacts are expected.
- e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

e) The proposed special event center does not anticipate any other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use. Any impacts are expected to be less than significant.

III. **AIR QUALITY**

Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to the following determinations. Would the Project:

⁴ California Department of Conservation: Farmland Mapping & Monitoring Program online application

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
a) Conflict with or obstruct implementation of the applicable air quality plan? a) The proposed special event site will be required to comply with Imperial County Air Pollution Control District's rules and regulations with emphasis on Regulation VIII – Fugitive Dust Rules which is a collection of rules designed to maintain fugitive dust emissions below 20% visual opacity per APCD's comment letter dated April 16, 2024 ⁵ . If the project operates any combustion equipment such as a generator a permit may be required by APCD. It is expected that compliance with APCD's rules and regulations would bring any impacts to a less than significant.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard? b) The proposed special event is not expected to result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard. As stated in III(a) the project will be required to comply with all of APCD's rules and regulations and it is expected that compliance with these rules and regulations as well as any required permits would bring any impacts to less than significant levels.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Expose sensitive receptors to substantial pollutant concentrations? c) The proposed special event center does not expect to expose sensitive receptors to substantial pollutant concentrations. The potential source of air pollutants would be dust and potential power/light generators and, as stated previously in this section, the project will be expected to comply with APCD's rules and regulations, compliance of which is expected to bring any impacts to less than significant levels.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Result in other emissions (such as those leading to odors adversely affecting a substantial number of people)? d) The proposed special event center is not anticipated to result in other emissions (such as those leading to odors adversely affecting a substantial number of people. Again, as stated previously it is expected that compliance with APCD's rules and regulations will bring any potential impacts to less than significant levels.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

IV. **BIOLOGICAL RESOURCES** *Would the project:*

- a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?
a) Per the Imperial County General Plan: Conservation and Open Space Element⁶ Figure 2, the proposed special event center is located within the Burrowing Owl Species Distribution Model. The project site is under seed with Bermuda grass which will be mowed periodically and maintained. Ground disturbance would come from the proposed future building of the 5,220 sq ft and 1,836 sq ft barns located on a 7 acres portion of the 13 acres parcel. Driveways and parking areas would be in designated areas with grass covering with the exception of a dirt road on the property and conditioned paved southern driveway entrance and exit per Caltrans letter dated July 18, 2024⁷. Per the California Department of Fish and Wildlife (CDFW) comment letter dated September 26, 2024, significant impacts to biological resources including nesting birds and burrowing owls and therefore recommend the following mitigation measures.

BIO-[B]: Assessment of Biological Resources

Prior to Project construction activities, a complete and recent inventory of rare, threatened, endangered, and other sensitive species located within the Project footprint and within off-site areas with the potential to be affected, including California Species of Special Concern (CSSC) and California Fully Protected Species (Fish and Game Code § 3511), will be completed. Species to be addressed should include all those which meet the CEQA definition (CEQA Guidelines § 15380). The inventory should address seasonal variations in use of the Project area and should not be limited to resident species. Focused species-specific surveys, completed by a qualified biologist and conducted at the appropriate time of year and time of day when the sensitive species are active or otherwise identifiable are required. Acceptable species-specific survey procedures should be developed in consultation with CDFW and the U.S. Fish and Wildlife Service, where necessary. Note that CDFW generally

⁵ Imperial County Air Pollution Control District comment letter dated: April 16, 2024

⁶ Imperial County General Plan: Conservation and Open Space Element

⁷ Caltrans letter dated July 18, 2024

Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

considers biological field assessments for wildlife to be valid for a one-year period, and assessments for rare plants may be considered valid for a period of up to three years. Some aspects of the proposed Project may warrant periodic updated surveys for certain sensitive taxa, particularly if the Project is proposed to occur over a protracted time frame, or in phases, or if surveys are completed during periods of drought.

BIO-[C]: Nesting Birds

Regardless of the time of year, nesting bird surveys shall be performed by a qualified avian biologist no more than 3 days prior to vegetation removal or ground-disturbing activities for all phases of Project construction. Pre-construction surveys shall focus on both direct and indirect evidence of nesting, including nest locations and nesting behavior. The qualified avian biologist will make every effort to avoid potential nest predation as a result of survey and monitoring efforts. If active nests are found during the pre-construction nesting bird surveys, a qualified biologist shall establish an appropriate nest buffer to be marked on the ground. Nest buffers are species specific and shall be at least 300 feet for passerines and 500 feet for raptors. A smaller or larger buffer may be determined by the qualified biologist familiar with the nesting phenology of the nesting species and based on nest and buffer monitoring results. Construction activities may not occur inside the established buffers, which shall remain on site until a qualified biologist determines the young have fledged or the nest is no longer active. Active nests and adequacy of the established buffer distance shall be monitored daily by the qualified biologist until the qualified biologist has determined the young have fledged or the Project has been completed. The qualified biologist has the authority to stop work if nesting pairs exhibit signs of disturbance.

BIO-[D]: Focused and Pre-Construction Surveys for Burrowing Owl

Suitable burrowing owl habitat has been confirmed on the site; therefore, focused burrowing owl surveys shall be conducted by a qualified biologist in accordance with the *Staff Report on Burrowing Owl Mitigation* (2012 or most recent version) prior to vegetation removal or ground-disturbing activities for all phases of Project construction. If burrowing owls are detected during the focused surveys, the qualified biologist and Project proponent shall begin coordination with CDFW and USFWS immediately, and shall prepare a Burrowing Owl Plan that shall be submitted to CDFW for review and approval prior to commencing Project activities. The Burrowing Owl Plan shall describe proposed avoidance, monitoring, relocation, minimization, and/or mitigation actions. The Burrowing Owl Plan shall include the number and location of occupied burrow sites, acres of burrowing owl habitat that will be impacted, details of site monitoring, and details on proposed buffers and other avoidance measures. If impacts to occupied burrowing owl habitat or burrow cannot be avoided, the Burrowing Owl Plan shall also describe minimization and compensatory mitigation actions that will be implemented. Proposed implementation of burrow exclusion and closure should only be considered as a last resort, after all other options have been evaluated as exclusion is not in itself an avoidance, minimization, or mitigation method and has the possibility to result in take. The Burrowing Owl Plan shall identify compensatory mitigation for the temporary or permanent loss of occupied burrow(s) and habitat consistent with the "Mitigation Impacts" section of the 2012 Staff Report and shall implement CDFW-approved mitigation prior to initiation of Project activities. If impacts to occupied burrows cannot be avoided, information shall be provided regarding adjacent or nearby suitable habitat available to owls. If no suitable habitat is available nearby, details regarding the creation and funding of artificial burrows (numbers, location, and type of burrows) and management activities for relocated owls shall also be included in the Burrowing Owl Plan. The Project proponent shall implement the Burrowing Owl Plan following CDFW and USFWS review and approval.

For all phases of Project construction, preconstruction burrowing owl surveys shall be conducted no less than 14 days prior to the start of Project-related activities and within 24 hours prior to ground disturbance, in accordance with the *Staff Report on Burrowing Owl Mitigation* (2012 or most recent version). Preconstruction surveys should be repeated when there is a pause in construction of more than 30 days. Preconstruction surveys should be performed by a qualified biologist following the recommendations and guidelines provided in the *Staff Report on Burrowing Owl Mitigation*. If the preconstruction surveys confirm occupied burrowing owl habitat, Project activities shall be immediately halted. The qualified biologist shall coordinate with CDFW and prepare a Burrowing Owl Plan that shall be submitted to CDFW and USFWS for review and approval prior to commencing Project activities.

It is expected to compliance with these mitigation measures would bring any impacts to less than significant.

- b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

b) The proposed special event center is not located near a riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service. The project is bounded by Hwy 86 to the east and Austin Rd and the Central Main Cana on the west and an agriculture field to the south. The project does not propose any development near the canal that would have a substantial adverse effect on the canal. Per the CDFW letter dated September 26, 2024 there may be potential significant impacts to the canal depending on construction activities and the following mitigation measure is recommended:

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	--------------------------------------	--	-------------------------------------	----------------

MM BIO-[E]: CDFW's Lake and Stream Alteration (LSA) Program

Prior to Project-activities and issuance of any grading permit, the Project Sponsor shall obtain written correspondence from the California Department of Fish and Wildlife (CDFW) stating that notification under section 1602 of the Fish and Game Code is not required for the Project, or the Project Sponsor shall obtain a CDFW-executed Lake and Streambed Alteration Agreement, authorizing impacts to Fish and Game Code section 1602 resources associated with the Project.

It is expected that compliance with this mitigation measure would bring any potential impacts to less than significant.

- | | | | | | |
|----|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| c) | Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| | c) The proposed special event center is not located on or near a state or federally protected wetlands and is therefore, not expected to have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means. Any impacts would be considered less than significant. | | | | |
| d) | Interfere substantially with the movement of any resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| | d) The proposed special event center is located on a 13.49 acres parcel with the proposed event area encompassing approximately 7 acres. The property is bounded by Hwy 86 to the east, Austin Rd and the Central Main Canal to the west and an agriculture field to the south and the north portion of the property contains an existing house and accessory structure. The project itself does not propose substantial development and is not expected to permanently operate daily or nightly. Therefore, the proposed project is not expected to substantially interfere with the movement of any resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites. Any impacts are expected to be less than significant. | | | | |
| e) | Conflict with any local policies or ordinance protecting biological resource, such as a tree preservation policy or ordinance? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| | e) The proposed special event center would be an allowed use within the current A-2 (General Agriculture) zone with an approved Conditional Use Permit per the Imperial County General Plan, Land Use Ordinance (Title 9) Division 5 and is not expected to conflict with any local policies or ordinance protecting biological resource, such as a tree preservation policy or ordinance. Therefore, any impacts would be considered less than significant. | | | | |
| f) | Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| | f) As stated in IV(e), the proposed special event center would be an allowed use per the Imperial County General Plan with the approval of a Conditional Use Permit. The project does not anticipate conflicting with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan. Any impacts would be considered less than significant. | | | | |

V. CULTURAL RESOURCES Would the project:

- | | | | | | |
|----|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a) | Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| | a) The proposed special event center is not anticipated to cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5 as the proposed project consists of pop-up shades, a Bermuda grass lawn encompassing the entire 7 acres of the project site including driveways and parking lots, and 2 proposed future barns totaling 7, 056 square feet and is on historically disturbed land. The project does not propose extensive new land disturbance such as digging or grading of the property. Additionally, AB 52 Opportunity to Consult letters were sent to the Quechan and Campo Band of Mission Indians tribes on April 05, 2024, and no comments have been received to date from either. Therefore, any impacts would be considered less than significant. | | | | |
| b) | Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	--------------------------------------	--	-------------------------------------	----------------

b) As stated in V(a) the project is located on historically disturbed land and the project does not propose extensive land disturbance. Therefore, the project does not anticipate causing a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5. Therefore, any impacts would be considered less than significant.

c) Disturb any human remains, including those interred outside of dedicated cemeteries?

c) The project is not located in or near a known cemetery or known human remains interred outside of a dedicated cemetery, and it is not anticipated that the project would disturb any unknown human remains as the project does not propose any significant land disturbance or removal. In case of the discovery of human remains, the project would be required to comply with all Federal, State, and Local laws concerning the discovery and treatment of human remains. Therefore, impacts are expected to be less than significant.

VI. **ENERGY** *Would the project:*

a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

a) The proposed project is a special event center that will consist of pop-up shade structures and 2 proposed barns with driveways and parking areas having a Bermuda grass cover. The project proposes up to 59 events per year with up to 300 guests plus staffing. Construction for the project would consist of the proposed barns and the paving and improving of the southern entrance and exit of the property onto Hwy 86. Energy consumption would result from fuel use during the paving process, construction of the barn and any generators needed for lighting during events. Electrical use onsite not generated from onsite electrical generators would come from the Imperial Irrigation District and would predominately be used for powering lights on the property and during events. It is not anticipated that these energy uses would result in potentially significant environmental impact due to wasteful inefficient, or unnecessary consumption of energy resources, during project construction or operation. Less than significant impacts are anticipated.

b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

b) The proposed special event center is not anticipated to conflict with or obstruct a state or local plan for renewable energy or energy efficiency. Any impacts would be considered less than significant.

VII. **GEOLOGY AND SOILS** *Would the project:*

a) Directly or indirectly cause potential substantial adverse effects, including risk of loss, injury, or death involving:

a) The proposed special event center is not anticipated to directly or indirectly cause potential substantial adverse effects, including risk of loss, injury, or death. Impacts are expected to be less than significant.

1) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42?

1) The proposed project site is not located in or near a known earthquake per the California Department of Conservation "CGS Seismic Hazards Program: Alquist-Priolo Fault Hazard Zones" online map⁸. The nearest known fault is approximately 1.5 miles southeast of the project and any shaking from a fault rupture would be similar if not the same as the City of Brawley which is located less than 1 mile northeast of the project site. The proposed special event center would consist of pop-up shades and 2 proposed barns which would be subject to building permits as well as the latest California building codes. Therefore, the project is not anticipated to Directly or indirectly cause potential substantial adverse effects, including risk of loss, injury, or death involving the rupture of a known earthquake fault. Any impacts are expected to be less than significant.

2) Strong Seismic ground shaking?

2) Imperial County is subject to potential seismic ground shaking due to the numerous faults in the area. The project site could experience strong seismic ground shaking but no more than the surrounding properties. The proposed project consists of pop-up shades and 2 barns which will be subject to building permits and the latest California building

⁸ 10. California Geological Survey Hazard Program: Alquist-Priolo Fault Hazard Zones

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
codes and therefore, is not expected to cause substantial adverse effects, including risk of loss, injury, or death. Any impacts would be considered less than significant.				
3) Seismic-related ground failure, including liquefaction and seiche/tsunami?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3) The proposed project is not located in a Tsunami inundation area according to the California Tsunami Data Map⁹, therefore, impacts are expected to be less than significant.				
4) Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
4) The proposed special event center is not located within a Landslide Activity area according to the Imperial County Seismic and Public Safety Element, Figure 2 (Landslide Activity)¹⁰. The topography within the project site is generally flat, and therefore will not be directly or indirectly affected by a landslide. No impacts are expected.				
b) Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) The proposed special event center is not located within an area of substantial soil erosion according to Imperial County Seismic and Public Safety Element, Figure 3 (Erosion Activity). Less than significant impacts are expected.				
c) Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the project, and potentially result in on- or off-site landslides, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) The project parcel has existing structures on the north portion of the property that are not part of the special event center project but are only a few hundred yards away. The project is not known to be located on a geologic unit or soil that is unstable or would become unstable and as stated above the project is not located in an area prone to landslides. The project does propose 2 barns that would require building permits as well as to comply with the latest California building codes. Therefore, impacts are expected to be less than significant.				
d) Be located on expansive soil, as defined in the latest Uniform Building Code, creating substantial direct or indirect risk to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) The proposed property does have existing structures on it with no know difference in soil between these structures and the project location. The proposed special event center proposes 2 barns that would require building permits as well as be required to comply with the latest California building codes. Therefore, impacts would be considered less than significant.				
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) The proposed special event center proposes using portable lavatory facilities with the possibility of installing bathrooms and a septic system in the future. As part of the permitting process for installing a septic system, a percolation test will be conducted on the site. If the soil does not pass the percolation test, then the septic system would not be permitted and an adequate number of portable lavatories as determined by Imperial County Division of Environmental Health, would remain in use. However, there is currently a house on the northern portion of the property which does have a septic system installed, so it is anticipated that the soils on the project site will be capable of supporting a septic system. Any impacts are expected to be less than significant.				
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f) The project is located on disturbed land that is currently seeded with Bermuda grass and ground disturbance would come from the construction of 2 barns and the paving of the entrance/exit on to Hwy 86 which is already a disturbed unpaved roadway. Therefore, it is not anticipated that the project would directly or indirectly destroy a unique paleontological resource or site or unique geologic feature. Any impacts are expected to be less than significant.				

VIII. **GREENHOUSE GAS EMISSION** *Would the project:*

- | | | | | |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a) Generate greenhouse gas emissions, either directly or | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|

⁹ California Tsunami Data Maps

¹⁰ Imperial County General Plan: Seismic and Public Safety Element

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
indirectly, that may have a significant impact on the environment? a) Temporary greenhouse gas emissions are expected to be generated as a result of traffic from invitees and event organizers. As previously mentioned under Section III, Air Quality, the applicant shall contact the APCD for compliance with their regulations, it is expected that such compliance would bring impacts to less than significant levels.				
b) Conflict with an applicable plan or policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases? b) The proposed special event center is not expected to conflict with an applicable plan, policy and/or regulation adopted for the purpose of reducing the emissions of greenhouse gases; as mentioned above under item b), applicant shall contact and comply with APCD regulations. Impacts are expected to be less than significant.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

IX. **HAZARDS AND HAZARDOUS MATERIALS** *Would the project:*

- | | | | | |
|---|--------------------------|--------------------------|-------------------------------------|-------------------------------------|
| a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?
a) The proposed special event center does not intend to transport, use or dispose hazardous materials. No impacts are expected. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| b) Create a significant hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment?
b) As mentioned above under item a), the proposed project does not include the use of hazardous materials. No impacts are expected. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?
c) No schools are known to be proposed or currently located within one-quarter mile of the proposed project; thus it will not present a risk to school facilities. No impacts are expected. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| d) Be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?
d) The proposed special event center is not located on a site included on a list of hazardous material sites ¹¹ ; therefore, less than significant impacts are expected. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?
e) The proposed project is not within two miles of a public or public use airport. The nearest airport is the Brawley Municipal Airport which is approximately 5 miles away to the northeast of the project site. Therefore, no impacts are expected. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?
f) The proposed special event center is not expected to impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan. The applicant shall be required to comply with Imperial County Fire Department (ICFD) requirements as stated in the ICFD comment letter dated: April 23, 2024 ¹² , such compliance is expected to bring impacts to less than significant levels. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

¹¹ EnviroStor Database

¹² Imperial County Fire Department comment letter dated: April 23, 2024

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires? g) As stated in IX(f) it is expected that compliance with ICFD's comment letter as well as all Federal, State, local regulations, codes and ordinances will bring any impacts to less than significant levels.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

X. **HYDROLOGY AND WATER QUALITY** *Would the project:*

- | | | | | |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?
a) The proposed special event center is not expected to violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality. Per the Division of Environmental Health Services letter dated: April 22, 2024, project would be required to apply for a Domestic Water Supply Permit (DWSP) if the project were to have 25 or more people, 60 days a year or more. The project proposes up to 59 events a year which would not require a permit. If the project were to exceed 59 events a year the proposed Conditional Use Permit would be required to be amended and the DWSP would be required. Therefore, the project is expected to have a less than significant impact. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?
b) The proposed special event center proposes to use water supplied by the Imperial Irrigation District that is also used by the home located on the northern portion of the property and would not decrease groundwater supplies or interfere substantially with groundwater recharge as the project does not propose affecting the 7-acre parcel site with impervious surfaces. Therefore, impacts are expected to be less than significant. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:
c) The proposed special event center is not located within a river, or a stream and the project propose 2 barns which will require building permits and the project site is proposed to have a full Bermuda grass ground cover, therefore, it is not expected that the project would substantially alter the existing drainage pattern of the site or area. Additionally, no major impervious surfaces are required other than the paved driveway per CALTRANS comment letter dated July 18, 2024. Impacts are considered less than significant. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| (i) result in substantial erosion or siltation on- or off-site;
(i) The proposed special event center project site is seeded with Bermuda grass with no ground alteration proposed aside from the building of 2 barns. Onsite driveways and parking areas will be covered with Bermuda grass as well which will limit the movement of soil due to wind or water. Therefore, impacts are expected to be less than significant. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| (ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;
(ii) The proposed special event center is not expected to substantially alter the existing drainage pattern on site and substantially increase the rate or amount of surface runoff in a manner which would result in flooding on or offsite, as no substantial change in the existing grading is proposed. Therefore, any impacts are expected to be less than significant. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| (iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or;
(iii) The proposed special event center does not propose to change the existing grading and therefore, it is not expected to substantially alter the existing drainage pattern on site and create or contribute runoff water, which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff. Any impacts are considered less than significant. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| (iv) impede or redirect flood flows?
(iv) The proposed special event center is not located in a flood zone X per FEMA 06025C1375C and is not expected to impede or redirect flood flows. Impacts are expected to be less than significant. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation? d) The proposed special event center is not located within a Tsunami inundation area, and according to the FEMA Flood Map Service Center¹³, the proposed project is not located within a flood hazard zone. Therefore, impacts related to a risk of release of pollutants due to project inundation if located within a flood hazard or tsunami zones are considered less than significant.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan? e) The project is not expected to conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. The project will be subject to all of the Division of Environmental Health Services' rules and regulations and it is expected that compliance would lessen any impacts to a less than significant level.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

XI. **LAND USE AND PLANNING** *Would the project:*

- a) Physically divide an established community?
a) The proposed special event center is surrounded by agricultural land with the City of Brawley less than 1 mile away to the northeast. The project will not physically divide an established community. No impacts are expected.
- b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?
b) The proposed special event center is not expected to conflict with the County's General Plan or Land Use Ordinance as a Conditional Use Permit was submitted for the proposed project. The A-2 zone requires the approval of a Conditional Use Permit per Imperial County Land Use Ordinance Title 9 § 90508.02 (aaa) Special Occasion Facility. Impacts are expected to be less than significant.

XII. **MINERAL RESOURCES** *Would the project:*

- a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?
a) The proposed special event center site is not located in an area classified to be a regionally important mineral resource per the California Department of Conservation- Mineral Land Classification¹⁴, additionally, there are no substantial proposed physical changes to the existing site other than the building of 2 barns totaling approximately 7,056 square feet on the 7 acres project site. Therefore, no impacts are anticipated.
- b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?
b) Per the Imperial County General Plan, Conservation and Open Space Element- Figure 8- Existing Mineral Resources, the proposed special event center site is not located within an area known to be classified as regionally important mineral resources. Therefore, it is not expected that the proposed project would result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan. Therefore, no impacts are expected.

XIII. **NOISE** *Would the project result in:*

- a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?
a) The project site is located within a Noise Impact Zone, which is an area that could be exposed to significant agricultural related noise, as it is located within 1,320 feet from existing farmland per Imperial County General Plan Land Use Element.

¹³ FEMA Flood Map Service Center

¹⁴ California Department of Conservation - <https://maps.conservation.ca.gov/cgs/informationwarehouse/index.html?map=mlc>

Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

The events hours would be limited to end 12 a.m.; however, the project will be subject to compliance with Imperial County General Plan Noise Element and with Imperial County Land Use Ordinance Division 7: Noise Abatement and Control. However, the nearest receptor (1 residence) is located 1,000 feet east of the event area. The conditional acceptable decimal level is 70 decibels from the property line in the A-2 zone. It is expected that compliance with the Noise Ordinance would lessen the noise impacts to less than significant levels. Per the CDFW letter dated September 26, 2024 there is concern that construction noise could impact fish and wildlife.

MM BIO-[F]: Construction Noise

During all Project construction, the County shall restrict use of equipment to hours least likely to disrupt wildlife (e.g., not at night or in early morning) and restrict use of generators except for temporary use in emergencies. Power to sites can be provided by solar PV (photovoltaic) systems, cogeneration systems (natural gas generator), small micro-hydroelectric systems, or small wind turbine systems. The County shall ensure the use of noise suppression devices such as mufflers or enclosures for generators. Sounds generated from any means must be below the 55-60 dB range within 50-feet from the source.

It is expected that compliance with mitigated measure would bring any potential impacts to less than significant levels.

- b) Generation of excessive groundborne vibration or groundborne noise levels?

b) Ground-borne vibration or ground-borne noise levels may be expected from music and traffic during events and temporarily during the improvements to the southern entrance/exit onto Hwy 86, however adherence to the Imperial County General Plan Noise Element and with Imperial County Land Use Ordinance Division 7: Noise Abatement and Control would ensure that such ground-borne vibration or ground-borne noise levels is not excessive; such compliance would bring impacts to less than significant levels.

- c) For a project located within the vicinity of a private airstrip or an airport land use plan or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

c) The proposed special event center is not located within the vicinity of a private airstrip or within the Compatibility Map of the Brawley Municipal Airport per the Imperial County Airport Land Use Compatibility Plan; therefore, it is not expected to expose people in the project area to excessive noise levels. Impacts are considered less than significant.

XIV. POPULATION AND HOUSING Would the project:

- a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and business) or indirectly (for example, through extension of roads or other infrastructure)?

a) The proposed special event center does not propose any housing or public infrastructure that may induce substantial unplanned population growth in an area either directly or indirectly. The project proposes having up to 59 events a year with a maximum of 300 guests per event. The only proposed development are 2 barns for event use and are not expected to be used for or create the need for more housing. Impacts are expected to less than significant.

- b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

b) The proposed special event center does not anticipate displacing a substantial number of existing people or housing necessitating the construction of replacement housing elsewhere. The proposed project will consist of pop-up tents and 2 proposed barns and host up to a proposed 59 events a year. Impacts are expected to be less than significant.

XV. PUBLIC SERVICES

- a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	--------------------------------------	--	-------------------------------------	----------------

acceptable service ratios, response times or other performance objectives for any of the public services:

a) The proposed special event center is not expected to result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services. It is expected that compliance with Imperial County Fire Department requirements per letter dated April 23, 2024, would lessen any public service impacts to less than significant levels.

1) Fire Protection?
1) The proposed special event center is not expected to create a substantial adverse impact to fire protection. Impacts are expected to be less than significant. Applicant shall comply with Imperial County Fire Department requirements per letter dated April 23-2024, to lessen any impact to less than significant levels.

2) Police Protection?
2) The proposed special event center is not expected to create a substantial adverse impact to police protection. Impacts are expected to be less than significant.

3) Schools?
3) The proposed special event center does not expect an increment in population that would require the construction of new educational facilities; therefore, no impacts are anticipated.

4) Parks?
4) The proposed special event center would not result in a substantial adverse physical impact to existing parks. No impacts are anticipated.

5) Other Public Facilities?
5) For the proposed project, applicant shall comply with Caltrans comment letter dated July 18, 2024, in order to lessen impacts to less than significant levels on Hwy 86.

XVI. RECREATION

a) Would the project increase the use of the existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

a) The proposed special event center does not propose new residential housing or an activity that would generate the increased use of public recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated. Therefore, no impacts are expected.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse effect on the environment?

b) The special event center proposes is not expected to require the construction or expansion of recreational facilities which might have an adverse effect on the environment as the project would be used for events such as weddings, birthdays, mixers etc. up to 59 days a year. Any impacts would be considered less than significant.

XVII. TRANSPORTATION Would the project:

a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

a) The proposed special event center is not expected to conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities. Compliance with Caltrans letter dated July 18, 2024, is expected to lessen impacts to less than significant levels.

b) Would the project conflict or be inconsistent with the CEQA Guidelines section 15064.3, subdivision (b)?

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	--------------------------------------	--	-------------------------------------	----------------

b) The proposed special event center will increase the number of vehicles during the event; however, it is not expected that it would exceed a significant threshold. Therefore, impacts are expected to be less than significant.

c) Substantially increases hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

c) The proposed special event center is located along a banked curve on Hwy 86 with the entrance/exit for the event center being approximately 700 feet away from the end of the curve allowing for vehicles to decelerate and enter onto the property. Additionally, per the Caltrans comment letter dated: July 18, 2024, the entrance/exit shall be improved and paved to allow for safe entry and exiting of the property on to Hwy 86. The project proposes up to 300 guests per event up to 59 days a year and does not trigger further improvements to Hwy 86 as none have been required via the Caltrans comment letter. It is not expected that the temporary increase in traffic up to 59 days a year will substantially increase hazards, and it is expected that compliance with the Caltrans letter will bring any impacts to a less than significant impact.

d) Result in inadequate emergency access?

d) Compliance with Caltrans comment letter dated July 18, 2024, and Imperial County Fire Department's comment letter dated April 23, 2024, would bring impacts to less than significant levels for the proposed special event center.

XVIII. TRIBAL CULTURAL RESOURCES

a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place or object with cultural value to a California Native American tribe, and that is:

a) The proposed project consists of pop-up shades, a Bermuda grass lawn encompassing the entire 7 acres of the project site including driveways and parking lots, and 2 proposed future barns totaling approximately 7,056 square feet and is on historically disturbed land. The project does not propose extensive new land disturbance such as digging or grading of the property. Additionally, AB 52 Opportunity to Consult letters were sent to the Quechan and Campo Band of Mission Indians tribes on April 05, 2024, and no comments have been received to date from either. Therefore, any impacts would be considered less than significant.

(i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as define in Public Resources Code Section 5020.1(k), or

(i) The proposed project site is not listed under the California Historical Resources in County of Imperial¹⁵ and does not appear to be eligible under Public Resources Code Section 21074 or 5020.1 (k). Therefore, impacts are considered less than significant.

0 (ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American Tribe.

(ii) No substantial evidence on the proposed project site has been found to be significant to a California Native American Tribe pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. Therefore, impacts are considered less than significant.

¹⁵ Office of Historic Preservation

Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

XIX. UTILITIES AND SERVICE SYSTEMS *Would the project:*

- a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction of which could cause significant environmental effects?
- a) The proposed special event center proposes up to 59 events and will not be subject to public water system requirements. Therefore, there will no need for new or expanded water, wastewater treatment or storm water drainage. Any impacts should be less than significant.**
- b) Have sufficient water supplies available to serve the project from existing and reasonably foreseeable future development during normal, dry and multiple dry years?
- b) The proposed special event center is expected to have sufficient water supplies and not be subject to public water system requirement given the proposed 59 events. Impacts are considered less than significant.**
- c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?
- c) The project proposes to use portable lavatories which will be required to be serviced by a locally licensed septage hauler. If a septic system is installed in the future, it will be required to be permitted through the Division of Public Health and be designed to meet capacity per the Division of Environmental Health (EHS) comment letter dated: April 22, 2024¹⁶. Impacts are expected to be less than significant.**
- d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?
- d) The proposed special event center will be required to comply with EHS comment email dated April 22, 2024, for Solid Waste Requirements; the applicant shall contract with a licensed commercial waste hauler for all of their solid waste disposal needs. Compliance with EHS requirements would bring impacts to less than significant levels.**
- e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?
- e) The proposed special event center is expected to comply with federal, state, and local management and reduction statutes and regulations related to solid waste with compliance with the EHS comment letter. Impacts are expected to be less than significant.**

XX. WILDFIRE

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the Project:

- a) Substantially impair an adopted emergency response plan or emergency evacuation plan?
- a) The proposed special event facility is not located in or near state responsibility areas or lands classified as very high fire hazard severity zones and it is designated as a Local Responsibility Area (LRA) zone per the California Department of Forestry and Fire Projection Map for Imperial County Draft Fire Hazard Draft Severity Zones in LRA. Additionally, applicant will need to comply with Imperial County Fire Department requirements per letter dated April 23, 2024. Therefore, any impacts would be considered less than significant.**
- b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?
- b) The proposed special event facility is in a generally flat terrain and would be subject to I.C. Fire Department requirements to ensure that any impacts related to wildfire risks exposing project occupants to pollutant concentrations from a wildfire would be less than significant.**

¹⁶ Imperial County Division of Environmental Health comment letter dated: April 22, 2024

	Potentially Significant Impact (PSI)	Less Than Significant with Mitigation Incorporated (LTSMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? c) The route of access will be required to support safety and emergency response vehicles in all-weather situations; Impacts are considered less than significant. Compliance with Caltrans and I.C. Fire Department requirements would bring impacts to less than significant levels.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes? d) The proposed special event facility site is in a generally flat terrain, and it is not located in a flooding zone, therefore it is not expected that it would expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes. Impacts are considered less than significant.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

VI. NEGATIVE DECLARATION – County of Imperial

The following Negative Declaration is being circulated for public review in accordance with the California Environmental Quality Act Section 21091 and 21092 of the Public Resources Code.

Project Name: Grand Vista Event Center

Project Applicant: Grand Vista Ranch/Grand Vista Event Center

Project Location: 4097 US Hwy 86, Brawley, CA 92227, Assessor's Parcel Number 040-420-020

Description of Project: The applicant Grand Vista Ranch, LLC proposes a special event center located on the approximately 7 acres on the southern portion of an approximately 13 acres parcel. The project expects to host up to 300 guests per event for up to 59 events per year consisting of weddings, birthday parties, fundraisers and other similar private events. The project proposes to hold events in outdoor and indoor settings with the outdoor events utilizing pop-up shades/tents and indoor events are proposed to be held in 2 proposed barns which are to be phased in based on the success of the initial outdoor event phase. The event center may supply tables, tablecloths, chairs, dishes, utensils, decorations and entertainment as needed. Events will have varying start times but will end at 12 am and clean up after the event is expected to be completed within 2 days following the event.

Waste disposal for events will be done through adequate trashcans which will be removed by a commercial waste hauler and wastewater would be through portable lavatories which will be pumped out by a licensed septage hauler. The project site will be fully covered with Bermuda grass to control fugitive dust due to foot and vehicle traffic.

VII. FINDINGS

This is to advise that the County of Imperial, acting as the lead agency, has conducted an Initial Study to determine if the project may have a significant effect on the environment and is proposing this Negative Declaration based upon the following findings:

The Initial Study shows that there is no substantial evidence that the project may have a significant effect on the environment and a **NEGATIVE DECLARATION** will be prepared.

The Initial Study identifies potentially significant effects but:

- (1) Proposals made or agreed to by the applicant before this proposed Mitigated Negative Declaration was released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur.
- (2) There is no substantial evidence before the agency that the project may have a significant effect on the environment.
- (3) Mitigation measures are required to ensure all potentially significant impacts are reduced to levels of insignificance.

A **MITIGATED NEGATIVE DECLARATION** will be prepared.

If adopted, the Negative Declaration means that an Environmental Impact Report will not be required. Reasons to support this finding are included in the attached Initial Study. The project file and all related documents are available for review at the County of Imperial, Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 (442) 265-1736.

NOTICE

The public is invited to comment on the proposed Negative Declaration during the review period.

Date of Determination Jim Minnick, Director of Planning & Development Services

The Applicant hereby acknowledges and accepts the results of the Environmental Evaluation Committee (EEC) and hereby agrees to implement all Mitigation Measures, if applicable, as outlined in the MMRP.

El Centro, CA 92243

Subject: Environmental Health Comments for Conditional Use Permit #24-0003

Mr. Newland,

The Imperial County Environmental Health Division (EHD) received a request for comments package for Conditional Use Permit #24-003, submitted by Grand Vista Event Center, LLC. The applicant is proposing to permit a new private event center located at 4097 Highway 86, south of Brawley (APN# 040-420-020). The property currently has an existing house and other accessory buildings on the northern portion of the 7-acre property.

Water

The applicants document states there is a water well that will provide water to the facility. Is this accurate? Or is this a surface water supply well (cistern possibly)? Please have the applicant clarify.

Additionally, if the applicant plans to have events year-round, the applicant will be subject to public water system requirements. This assumes that the facility will have 25 or more people for at least 60 days out of the year (60 events or more). If this is the case, the applicant will need to submit a Domestic Water Supply Permit Application to EHD. Please have the applicant contact our office to discuss these requirements in detail.

Wastewater

The applicant is proposing to use port-a-potties for all events, with the option of building a septic system later. Applicant shall be aware that a septic system will be required if they decide to construct restrooms. If existing restrooms are to be used, applicant shall have the septic system certified and have design flows calculated by a licensed engineer, to ensure it is able to meet anticipated demand.

Port-a-potties shall be serviced by a locally licensed septage hauler and shall be installed in a manner that prevents them from tipping over or spilling waste onto the ground.

Solid Waste

The applicant shall contract with a locally licensed commercial waste hauler.

Division of Environmental Health, 797 Main Street, Suite B, El Centro, CA 92243
(442) 265-1888 • (442) 265-1903 Fax • icphd.org

EEC ORIGINAL PKG

Mosquito Abatement Plan

If the project is required to construct an on-site stormwater basin, applicant shall submit a mosquito abatement plan and obtain approval from the Vector Control District.

Commercial Kitchen Requirements

The applicant does not address whether food/liquor will be provided by licensed vendors. These vendors/caterers are required to hold current Imperial County Retail Food permits.

The applicant is required to comply with the California Retail Food Code and obtain a retail food facility permit from EHD if food preparation, serving, or utensil washing will be conducted at the event center by the operators.

The applicant is to operate the facility in a manner that would not involve the facility preparing, serving, storing food, drinks, or utensil washing. Should the applicant elect to prepare food onsite, or wash equipment the supplied water must meet transient noncommunity standards for potable water for food preparation, handwashing, and/or warewashing.

Public events such as fund raisers will be required to complete Temporary Food Facility applications through this division. Applications are accepted a minimum of two weeks prior to the event.

Applicant to state the source and operating procedures to provide potable water to guests and for supporting the Temporary Food Facilities/Caterers that will be operating during fund raisers or other events.

EHD reserves the right to provide further comments as this project moves forward through the permitting process. If you or the applicant have any questions, please do not hesitate to contact our office.

Regards,

Jorge A. Perez

RE: Conditional Use Permit #24-0003/IS#24-0005
Grand Vista Event Center, LLC
4097 US Hwy 86, Brawley CA 92227

Imperial County Fire Department would like to thank you for the opportunity to review and comment on CUP #24-0003 for Grand Vista Event Center, LLC located at 4097 US Hwy 86, Brawley CA 92227, APN: 040-420-020.

Imperial County Fire Department has the following comments and/or requirements.

- An approved water supply connected to a Draft Hydrant(s) connection as required by “Imperial County Fire Department Fire Fighting Water Supply Specification and requirement for Rural Applications”. Water capacity amount will be determined by Imperial County Fire Department base on final design and project review. Water supply and draft hydrant connections shall be accessible, and supply of water shall be maintained at all times.
- Fire department access and access roads shall be in accordance with the California Fire Code Chapter 5, with a width of at least 20 feet and all-weather surface capable of supporting fire apparatus. Fire department access roads will be provided with approved turn around approved by Imperial County Fire Department.
- Gates will be in accordance with the current adapted fire code and the facility will maintain a Knox Box/lock for access on site.
- Secondary access shall be required and shall be kept clear of vehicle congestion and other factors that could limit access.
- An approved fire safety and evacuation plan shall be developed and approved by Imperial County Fire Department. The evacuation plan shall be in accordance with California Fire Code Chapter 4.
- Fireworks and pyrotechnics shall be conducted by a California license Professional Public Display Pyrotechnics. Approval for use of fireworks and/or pyrotechnics from Imperial County Fire Department shall be obtained before any event. Professional Public Display Pyrotechnics shall contact Imperial County Fire Department for approval before any event. Fireworks and pyrotechnics shall be in accordance with California Fire Code Chapter 56. This includes but not limited to:
 - Fireworks (including California Safe and Sane)

RECEIVED

By Imperial County Planning & Development Services at 9:40 am, Apr 17, 2024

Jim Minnick, Director
Imperial County Planning & Development Services
801 Main Street
El Centro, CA 92243

SUBJECT: Conditional Use Permit 24-0003 Grand Vista Event Center LLC

Dear Mr. Minnick,

The Imperial County Air Pollution Control Districts (Air District) thanks you for the opportunity to comment on the Conditional Use Permit (CUP) 24-0003 (Project). The project proposes an event center to host weddings, birthdays, fundraisers, private events, etc. with a maximum of 300 guests, using approximately 7 acres of a 14-acre parcel. The project is located at 4097 US Hwy 86, Brawley also identified as Assessor's Parcel Number 040-420-020.

The Air District reminds the applicant that the project and any future construction must comply with all Air District rules and regulations and the Air District would emphasize Regulation VIII – Fugitive Dust Rules, a collection of rules designed to maintain fugitive dust emissions below 20% visual opacity. If the event center will operate combustion equipment such as a generator, it may be subject to Air District permitting requirements. In this event, the Air District would request the applicant submit an application for engineering review of the project and coordinate with the Engineering & Permitting Division directly for the review.

The Air District requests a copy of the draft CUP prior to recording for review.

The Air District's rules and regulations can be found online for your review at <https://apcd.imperialcounty.org/rules-and-regulations/> and permitting forms can be found at <https://apcd.imperialcounty.org/engineering/>. Should you have any questions please feel free to contact the Air District for assistance at (442) 265-1800.

Respectfully,

Ismael Garcia

Attention: Derek Newland, Planner III

SUBJECT: CUP 24-0003 Grand Vista Event Center, LLC
Located on 4097 US Highway 86, Brawley, CA 92227
APN 040-420-020

Dear Mr. Minnick:

This letter is in response to your submittal received by this department on April 5, 2024, for the above-mentioned project. The applicant is proposing an event center for weddings, birthdays, fundraisers, private events, etc. on +/- 14 acres, initially utilizing shade structures and portable restrooms with plans for future enclosed buildings. The maximum number of guests proposed is 300 individuals.

Department staff has reviewed the package information, and the following comments shall be Conditions of Approval:

1. A Drainage and Grading Plan to provide for property grading and drainage control, which shall also include prevention of sedimentation of damage to off-site properties. Said plan shall be completed per the Engineering design Guidelines Manual for the Preparation and Checking of Street Improvements, Drainage and Grading Plans within Imperial County. The Drainage and Grading Plan shall be submitted to this department for review and acceptance. The applicant shall implement the approved plan. Employment of the appropriate Best Management Practices (BMP's) shall be included.

INFORMATIVE

- All solid and hazardous waste shall be disposed of in approved solid waste disposal sites in accordance with existing County, State and Federal regulations (Per Imperial County Code of Ordinances, Chapter 8.72).
- The project may require a National Pollutant Discharge Elimination System (NPDES) permit and Notice of Intent (NOI) from the Regional Water Quality Control Board (RWQCB) prior county approval of onsite grading plan (40 CFR 122.28).
- A Transportation Permit may be required from road agency(s) having jurisdiction over the haul route(s) for any hauls of heavy equipment and large vehicles which impose greater than legal loads and/or dimensions on riding surfaces, including bridges. (Per Imperial County Code of Ordinances, Chapter 12.10.020 B).

An Equal Opportunity / Affirmative Action Employer

EEC ORIGINAL PKG

- Coordination with Caltrans may be required for access to project site from SR-86.

Should you have any questions, please do not hesitate to contact this office. Thank you for the opportunity to review and comment on this project.

IID

A century of service.

www.iid.com

Since 1911

April 11, 2024

Mr. Derek Newland
Planner III
Planning & Development Services Department
County of Imperial
801 Main Street
El Centro, CA 92243

RECEIVED

By Imperial County Planning & Development Services at 3:56 pm, Apr 11, 2024

SUBJECT: Grand View Vista Event Center Project; CUP24-0003, IS24-0005

Dear Mr. Newland:

On April 5, 2024, the Imperial Irrigation District received from the Imperial County Planning & Development Services Department, a request for agency comments on the Grand View Vista Event Center, LLC project; Conditional Use Permit No. 24-0003, Initial Study No. 24-0005. The applicant proposes an event center on approximately 14 acres located at 4097 Hwy. 86, Brawley, California (APN 040-420-020-001) initially utilizing shade structures and portable bathrooms with plans for future enclosed buildings.

The IID has reviewed the application and has the following comments:

1. Currently there is existing electrical service to the property. If the proposed project requires additional electrical service to the existing one, the applicant should be advised to contact Gabriel Ramirez, IID project development service planner, at (760) 339-9257 or e-mail Mr. Ramirez at gramirez@iid.com to initiate the customer service application process. In addition to submitting a formal application (available for download at the website <http://www.iid.com/home/showdocument?id=12923>), the applicant will be required to submit an AutoCAD file of site plan, approved electrical plans, electrical panel size and panel location, operating voltage, electrical loads, project schedule, and the applicable fees, permits, easements and environmental compliance documentation pertaining to the provision of electrical service to the project. The applicant shall be responsible for all costs and mitigation measures related to providing electrical service to the project.
2. Electrical capacity is limited in the project area. A circuit study may be required. Any system improvements or mitigation identified in the circuit study to enable the provision of electrical service to the project shall be the financial responsibility of the applicant.
3. Applicant shall provide a surveyed legal description and an associated exhibit certified by a licensed surveyor for all rights of way deemed by IID as necessary to accommodate the project electrical infrastructure. Rights-of-Way and easements shall be in a form acceptable to and at no cost to IID for installation, operation, and maintenance of all electrical facilities.

4. The proposed water system for the event center is an existing water well located on the parcel. Should the applicant want a future water supply from IID, Justina Gamboa-Arce, Planner Water Resources Senior, should be contacted at (760) 339-9085 or at jgamboarce@iid.com for additional information.
5. IID water facilities that could be impacted by the project include the Central Main Canal and Lavender Lateral 1A.
6. Fences should be installed at the boundary of IID's right of way for safety and to allow access for IID operation and maintenance activities. The project's fencing plan should address IID's right of way.
7. Any construction or operation on IID property or within its existing and proposed right of way or easements including but not limited to: surface improvements such as proposed new streets, driveways, parking lots, landscape; and all water, sewer, storm water, or any other above ground or underground utilities; will require an encroachment permit, or encroachment agreement (depending on the circumstances). A copy of the IID encroachment permit application and instructions for its completion are available at <https://www.iid.com/about-iid/department-directory/real-estate>. The IID Real Estate Section should be contacted at (760) 339-9239 for additional information regarding encroachment permits or agreements. No foundations or buildings will be allowed within IID's right of way.
8. The applicant may not use IID's canal or drain banks to access the project site. Any abandonment of easements or facilities will be approved by IID based on systems (Irrigation, Drainage, Power, etc.) needs.
9. Should the project require site access from Austin Road, across the Central Main Canal, an IID crossing and encroachment permit will be required. When new crossings or modification to the existing crossings are needed, the applicant will be responsible for the cost of these improvements and IID will design and construct them.
10. In addition to IID's recorded easements, IID claims, at a minimum, a prescriptive right of way to the toe of slope of all existing canals and drains. Where space is limited and depending upon the specifics of adjacent modifications, the IID may claim additional secondary easements/prescriptive rights of ways to ensure operation and maintenance of IID's facilities can be maintained and are not impacted and if impacted mitigated. Thus, IID should be consulted prior to the installation of any facilities adjacent to IID's facilities. Certain conditions may be placed on adjacent facilities to mitigate or avoid impacts to IID's facilities.
11. Any new, relocated, modified or reconstructed IID facilities required for and by the project (which can include but is not limited to electrical utility substations, electrical transmission and distribution lines, water deliveries, canals, drains, etc.) need to be included as part of the project's California Environmental Quality Act (CEQA) and/or National Environmental Policy Act (NEPA) documentation, environmental impact analysis and mitigation. Failure to do so will result in postponement of any construction and/or modification of IID facilities until such time as the environmental documentation is amended and environmental

Derek Newland
April 11, 2024
Page 3

impacts are fully analyzed. Any and all mitigation necessary as a result of the construction, relocation and/or upgrade of IID facilities is the responsibility of the project proponent.

Should you have any questions, please do not hesitate to contact me at 760-482-3609 or at dvargas@iid.com. Thank you for the opportunity to comment on this matter.

PM 17.44

Grand Vista Event Center
CUP#24-0003, IS#24-0005

Mr. Derek Newland
Planner III
Imperial County Planning and Development Services
801 Main St.
El Centro, CA 92243

Dear Mr. Newland:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the Conditional Use Permit (CUP#24-0003) and the Initial Study (IS#24-0005) for the Grand Vista Event Center Project located near State Route 86 (SR-86). The mission of Caltrans is to provide a safe and reliable transportation network that serves all people and respects the environment. The Local Development Review (LDR) Program reviews land use projects and plans to ensure consistency with our mission and state planning priorities.

Safety is one of Caltrans' strategic goals. Caltrans strives to make the year 2050 the first year without a single death or serious injury on California's roads. We are striving for more equitable outcomes for the transportation network's diverse users. To achieve these ambitious goals, we will pursue meaningful collaboration with our partners. We encourage the implementation of new technologies, innovations, and best practices that will enhance the safety on the transportation network. These pursuits are both ambitious and urgent, and their accomplishment involves a focused departure from the status quo as we continue to institutionalize safety in all our work.

Caltrans is committed to prioritizing projects that are equitable and provide meaningful benefits to historically underserved communities, to ultimately improve transportation accessibility and quality of life for people in the communities we serve.

We look forward to working with the County of Imperial (County) in areas where the County and Caltrans have joint jurisdiction to improve the transportation network and

"Provide a safe and reliable transportation network that serves all people and respects the environment"

EEC ORIGINAL PKG

connections between various modes of travel, with the goal of improving the experience of those who use the transportation system.

Caltrans has the following comments:

Traffic Engineering and Analysis

- Caltrans District 11 standard practice is to follow the Transportation Research Board (TRB) "Access Management Manual" on reducing the access points onto the Caltrans Highway SR-86 to improve livability and reduce the conflict points to all users. SR-86 at this location is access controlled. There are two existing access openings along this area, driveways shall only be allowed within the existing access openings. Any modification to existing access opening will need to be consulted and approved by Caltrans' Right-of-Way (R/W) Engineering and Design Branches.
- Clearly identify Caltrans' R/W line on the plan.
- Frontage road or dirt path construct for private use is prohibited. Caltrans' R/W maps do not show any frontage road or dirt path inside Caltrans' R/W. Provide measurement from the edge of traveled way and clearly show that the dirt path is outside Caltrans' R/W.
- The site plan indicates an easement adjacent to SR-86. Please clarify who the easement belongs to. Please provide any and all easement documents.
- All new driveway/roadway connections shall comply with the latest Caltrans Highway Design standards. Driveways shall be paved according to Caltrans latest standard plans and specifications. See HDM Topic 205.4 for additional information.
- Sight distance exhibits will be required to submit for review for all new driveways and new minor street connections inside Caltrans' R/W. See Highway Design Manual (HDM) Topic 201 and Topic 405 for additional information on the requirements of stopping, decision, and corner sight distance.
- Provide truck turning templates for the proposed driveway(s). See HDM Topic 404 for further details.
- R/W maps regarding access opening/rights of ingress and egress are attached for your reference.

Hydrology and Drainage Studies

- Please provide hydraulics studies, drainage, and grading plans to Caltrans for review.
- Provide a pre and post-development hydraulics and hydrology study. Show drainage configurations and patterns.
- Provide drainage plans and details. Include retention or detention basin details of inlets/outlets.

Mr. Derek Newland, Planner III
July 18, 2024
Page 3

- Provide a contour grading plan with legible callouts and minimal building data. Show drainage patterns.
- On all plans, show Caltrans' R/W.
- Early coordination with Caltrans Hydraulics Branch is recommended.
- Caltrans generally does not allow development projects to impact hydraulics within the State's R/W. Any modification to the existing Caltrans drainage and/or increase in runoff to State facilities will not be allowed.

Traffic Control Plan

A Traffic Control Plan is to be submitted to Caltrans District 11, including SR-86 at least 30 days prior to the start of any construction. Traffic shall not be unreasonably delayed. The plan shall also outline suggested detours to use during closures, including routes and signage.

Potential impacts to the highway facilities (SR-86) and traveling public from the detour, demolition and other construction activities should be discussed and addressed before work begins.

Noise

The applicant must be informed that in accordance with 23 Code of Federal Regulations (CFR) 772, Caltrans is not responsible for existing or future traffic noise impacts associated with the existing configuration of SR-86.

Environmental

Caltrans welcomes the opportunity to be a Responsible Agency under the California Environmental Quality Act (CEQA), as we have some discretionary authority of a portion of the project that is in Caltrans' R/W through the form of an encroachment permit process. We look forward to the coordination of our efforts to ensure that Caltrans can adopt the alternative and/or mitigation measure for our R/W. We would appreciate meeting with you to discuss the elements of the Environmental Document that Caltrans will use for our subsequent environmental compliance.

An encroachment permit will be required for any work within the Caltrans' R/W prior to construction. As part of the encroachment permit process, the applicant must provide approved final environmental documents for this project, corresponding technical studies, and necessary regulatory and resource agency permits. Specifically, CEQA determination or exemption. The supporting documents must address all environmental impacts within the Caltrans' R/W and address any impacts from avoidance and/or mitigation measures.

"Provide a safe and reliable transportation network that serves all people and respects the environment"

EEC ORIGINAL PKG

Mr. Derek Newland, Planner III
July 18, 2024
Page 4

We recommend that this project specifically identifies and assesses potential impacts caused by the project or impacts from mitigation efforts that occur within Caltrans' R/W that includes impacts to the natural environment, infrastructure including but not limited to highways, roadways, structures, intelligent transportation systems elements, on-ramps and off-ramps, and appurtenant features including but not limited to fencing, lighting, signage, drainage, guardrail, slopes and landscaping. Caltrans is interested in any additional mitigation measures identified for the project's Draft Environmental Document.

Right-of-Way

Per Business and Profession Code 8771, perpetuation of survey monuments by a licensed land surveyor is required, if they are being destroyed by any construction.

Any work performed within Caltrans' R/W will require discretionary review and approval by Caltrans and an encroachment permit will be required for any work within the Caltrans' R/W prior to construction.

Caltrans owns fee along this stretch of SR-86 along with access control. Caltrans information does not show a frontage road alongside Caltrans' R/W but instead, Caltrans owns the entire R/W.

There are two access openings on the west R/W line. The one on the south is 40' wide at the south property line. The one at the north end is 20' wide, which appears to have been closed. Both of them appear to be close to the location shown on the applicant's proposed site plan.

Caltrans' R/W maps do not show any frontage road and they don't call out any "easement." It is not clear whose easement (frontage road) it is. Attached are the R/W maps and R/W Easement Exhibit for the proposed site.

Any proposed access points within Caltrans' R/W shall stay within the permitted access openings.

Any improvements made to existing access openings within Caltrans' R/W will require coordination with Caltrans Traffic Engineering and Analysis (TE&A) Branch to ensure the required length, and standards for driveway spacings are being followed.

Please confirm where the proposed project access points are legally supposed to be. There is no allowance for access openings along this stretch of SR-86 other than the

"Provide a safe and reliable transportation network that serves all people and respects the environment"

EEC ORIGINAL PKG

Mr. Derek Newland, Planner III
July 18, 2024
Page 5

two permitted openings shown in the R/W Easement Exhibit and our Caltrans' R/W maps.

Please confirm Caltrans' R/W line on all plans and maps provided. Indicate where Caltrans' R/W line is versus adjacent property line through clear callouts (e.g., Caltrans' Right of Way).

Additional information regarding encroachment permits may be obtained by visiting the website at <https://dot.ca.gov/programs/traffic-operations/ep>. Projects with the following:

- require a Caltrans Encroachment Permit.
- have completed the Caltrans Local Development Review (LDR) process.
- have an approved environmental document.

are to submit documents for Quality Management Assessment Process (QMAP) process via email to D11.QMAP.Permits@dot.ca.gov. Early coordination with Caltrans is strongly advised for all encroachment permits.

If you have any questions or concerns, please contact Charlie Lecourtois, LDR Coordinator, at (619) 985-4766 or by e-mail sent to charlie.lecourtois@dot.ca.gov.

Sincerely,

Kimberly D. Dodson

Dear Derek Newland:

Grand Vista Event Center LLC/Grand Vista Ranch LLC (PROJECT)
NEGATIVE DECLARATION (ND)
SCH# 2024081216

The California Department of Fish and Wildlife (CDFW) received a Notice of Intent to Adopt an ND from Imperial County for the Project pursuant the California Environmental Quality Act (CEQA) and CEQA Guidelines.¹

Thank you for the opportunity to provide comments and recommendations regarding those activities involved in the Project that may affect California fish and wildlife. Likewise, we appreciate the opportunity to provide comments regarding those aspects of the Project that CDFW, by law, may be required to carry out or approve through the exercise of its own regulatory authority under the Fish and Game Code.

CDFW ROLE

CDFW is California's **Trustee Agency** for fish and wildlife resources and holds those resources in trust by statute for all the people of the State. (Fish & G. Code, §§ 711.7, subd. (a) & 1802; Pub. Resources Code, § 21070; CEQA Guidelines § 15386, subd. (a).) CDFW, in its trustee capacity, has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species. (*Id.*, § 1802.) Similarly, for purposes of CEQA, CDFW is charged by law to provide, as available, biological expertise during public agency environmental review efforts, focusing specifically on projects and related activities that have the potential to adversely affect fish and wildlife resources.

CDFW is also submitting comments as a **Responsible Agency** under CEQA. (Pub. Resources Code, § 21069; CEQA Guidelines, § 15381.) CDFW expects that it may need to exercise regulatory authority as provided by the Fish and Game Code. As proposed, for example, the Project may be subject to CDFW's lake and streambed alteration regulatory authority. (Fish & G. Code, § 1600 et seq.) Likewise, to the extent implementation of the Project as proposed may result in "take" as defined by State law of any species protected under the California Endangered Species Act (CESA) (Fish & G. Code, § 2050 et seq.), the project proponent may seek related take authorization as provided by the Fish and Game Code.

PROJECT DESCRIPTION SUMMARY

Proponent: Grand Vista Event Center LLC/Grand Vista Ranch LLC

Objective: The Project is proposing a special event center located on approximately 7 acres in the southern portion of an approximately 13-acre parcel. The Project expects to host up to 300 guests per event for up to 59 events per year consisting of weddings, birthday parties, fundraisers, and other similar private events in outdoor and indoor settings with the outdoor events utilizing pop-up shades/tents and indoor events held in 2 proposed barns, which are to be phased in based on the success of the initial outdoor event phase. Events will have varying start times but will end at 12 am, and clean up after the event is expected to be completed within 2 days following the event. Waste disposal

¹ CEQA is codified in the California Public Resources Code in section 21000 et seq. The "CEQA Guidelines" are found in Title 14 of the California Code of Regulations, commencing with section 15000.

for events will be done through adequate trash cans, which will be removed by a commercial waste hauler, and wastewater would be through portable lavatories, which will be pumped out by a licensed septage hauler. The Project site will be fully covered with Bermuda grass to control fugitive dust due to foot and vehicle traffic. Primary Project activities include ground-disturbing activities including grading, paving, and building construction.

Location: The Project is located at 4097 US Highway 86, in the City of Brawley, County of Imperial, State of California, zip code 92227, at the intersection of Highway 86 and Austin Road. The GPS coordinates for the Project site are 32°56'46.92" N, 115°34'18.02" W. The Project is located on an approximately 13-acre property on Assessor's Parcel Number 040-420-020-000. The parcel is bounded on the west by the Central Main Canal and Austin Road, on the east by Highway 86, and on the south by an agricultural field.

Timeframe: The ND does not provide any information regarding the timeframe for the proposed Project.

COMMENTS AND RECOMMENDATIONS

CDFW has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species (i.e., biological resources). CDFW offers the comments and recommendations below to assist Imperial County (County) in adequately identifying and/or mitigating the Project's significant, or potentially significant, direct and indirect impacts on fish and wildlife (biological) resources. Editorial comments or other suggestions may also be included to improve the document. The ND has not adequately identified and disclosed the Project's impacts (i.e., direct, indirect, and cumulative) to biological resources and whether those impacts are less than significant.

I. Project Description and Related Impact Shortcoming

COMMENT #1: Timing of Construction and Construction Activities

Initial Study/Negative Declaration (IS/ND) Document, Section #II, Page #8

Issue: CDFW is concerned that the Project description does not provide a complete and accurate description of the Project's timeline. More information is needed regarding the schedule of construction activities for the Project's separate phases to ensure the impacts of the Project are reduced to a level less than significant.

Specific impact: The ND (p. 8) states that "the Project proposes to hold events in outdoor and indoor settings with the outdoor events utilizing pop-up shades/tents and indoor events are proposed to be held in 2 proposed barns which are to be phased in based on the success of the initial outdoor event phase." However, no further information is provided regarding a construction schedule for each separate phase of the Project. If the Project site is left vacant or left graded and inactive in the interim period between construction phases, environmental conditions may change. Grading and leaving a site inactive may result in the area becoming occupied by wildlife that utilize disturbed areas (e.g., ground squirrels and burrowing owls). Burrowing owls frequently move into disturbed areas prior to and during construction since they are adapted to highly modified habitats (Chipman et al. 2008; Coulombe 1971). Without a complete Project description regarding the construction schedule, CDFW cannot accurately assess the impacts to biological resources that have potential to occur.

Evidence impact would be significant: CEQA is predicated on a complete and accurate description of the proposed Project. Without a complete and accurate Project description, the ND likely provides an incomplete assessment of Project-related impacts to biological resources.

Recommendation: CDFW recommends that Imperial County recirculate a revised Mitigated Negative Declaration (MND) that includes a complete Project description with details regarding the timeline for all Project activities in each phase.

II. Environmental Setting and Related Impact Shortcoming

COMMENT #2: Assessment of Biological Resources

IS/ND Document, Section #IV, Page #17

Issue: The ND does not adequately identify the Project's significant, or potentially significant, impacts to biological resources.

Specific impact: The ND bases its analysis of impacts to biological resources on the Imperial County General Plan's Conservation and Open Space Element from 2016. CDFW generally considers field assessments for wildlife to be valid for a one-year period, and assessments for rare plants may be considered valid for a period of up to three years. CDFW is concerned that no recent biological field assessment and no recent focused or protocol-level surveys were performed for the detection of special-status species on the Project site and in the surrounding area. CDFW is concerned about the potential for special-status species to occur on or near the Project site. The California Natural Diversity Database (CNDDDB) and Biogeographic Information and Observation System (BIOS) indicate that occurrences of ESA-listed, CESA-listed, or other special-status species have been reported, or have the potential to occur, within a 3-mile radius of the Project area including, but not limited to, the following:

Invertebrate: Crotch's bumble bee (*Bombus crotchii*); **Reptiles:** Colorado Desert fringe-toed lizard (*Uma notata*), flat-tailed horned lizard (*Phrynosoma mcallii*); **Birds:** burrowing owl (*Athene cunicularia*), crissal thrasher (*Toxostoma crissale*), fulvous whistling-duck (*Dendrocygna bicolor*), Gila woodpecker (*Melanerpes uropygialis*), horned lark (*Eremophila alpestris*), least Bell's vireo (*Vireo bellii pusillus*), loggerhead shrike (*Lanius ludovicianus*), northern harrier (*Circus cyaneus*), redhead (*Aythya americana*), white-tailed kite (*Elanus leucurus*), yellow warbler (*Setophaga petechia*), Yuma Ridgway's rail (*Rallus longirostris yumanensis*); **Mammals:** American badger (*Taxidea taxus*), pallid bat (*Antrozous pallidus*), southern grasshopper mouse (*Onychomys torridus*), western yellow bat (*Lasiurus xanthinus*).

Recent surveys during the appropriate times of the year are needed to identify potential impacts to biological resources; inform appropriate avoidance, minimization, and mitigation measures; and determine whether impacts to biological resources have been mitigated to a level that is less than significant. Additionally, the ND should acknowledge that if the Project site is left vacant or left graded and inactive in the interim period between construction phases, environmental conditions may change. Grading and leaving a site inactive may result in the area becoming occupied by wildlife that utilize disturbed areas (e.g., ground squirrels and burrowing owls).

Evidence impact would be significant: Compliance with CEQA is predicated on a complete and accurate description of the environmental setting that may be affected by the proposed Project. CDFW is concerned that the assessment of the existing environmental setting with respect to biological resources has not been adequately analyzed in the ND. CDFW is concerned that without a complete and accurate description of the existing environmental setting, the ND likely provides an incomplete or inaccurate analysis of Project-related environmental impacts and whether those impacts have been mitigated to a level that is less than significant. Section 15125(c) of the CEQA Guidelines states that knowledge of the regional setting of a Project is critical to the assessment of environmental impacts, that special emphasis should be placed on environmental resources that are rare or unique to the region, and that significant environmental impacts of the proposed Project are adequately investigated and discussed.

Recommended Potentially Feasible Mitigation Measure: To establish the existing environmental setting with respect to biological resources, CDFW recommends that a

revised MND include the results of recent biological surveys as described in the following mitigation measure, as well as mitigation measures to reduce impacts to less than significant.

Mitigation Measure BIO-[A]: Assessment of Biological Resources

Prior to Project construction activities, a complete and recent inventory of rare, threatened, endangered, and other sensitive species located within the Project footprint and within off-site areas with the potential to be affected, including California Species of Special Concern (CSSC) and California Fully Protected Species (Fish and Game Code § 3511), will be completed. Species to be addressed should include all those which meet the CEQA definition (CEQA Guidelines § 15380). The inventory should address seasonal variations in use of the Project area and should not be limited to resident species. Focused species-specific surveys, completed by a qualified biologist and conducted at the appropriate time of year and time of day when the sensitive species are active or otherwise identifiable are required. Acceptable species-specific survey procedures should be developed in consultation with CDFW and the U.S. Fish and Wildlife Service, where necessary. Note that CDFW generally considers biological field assessments for wildlife to be valid for a one-year period, and assessments for rare plants may be considered valid for a period of up to three years. Some aspects of the proposed Project may warrant periodic updated surveys for certain sensitive taxa, particularly if the Project is proposed to occur over a protracted time frame, or in phases, or if surveys are completed during periods of drought.

Pursuant to the CEQA Guidelines, section 15097(f), CDFW has prepared a draft mitigation monitoring and reporting program (MMRP) for CDFW-recommended MM BIO-[A] through MM BIO-[F].

III. Mitigation Measure or Alternative and Related Impact Shortcoming

COMMENT #3: Nesting Birds

IS/ND Document, Section #IV, Page #17

Issue: CDFW is concerned that the ND does not sufficiently identify Project impacts to nesting birds or ensure that impacts are reduced to a level less than significant.

Specific impact: The ND (p. 17) states: “The proposed special event center is not located near a riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service. The Project is bounded by Hwy 86 to the east and Austin Rd and the Central Main Canal on the west and an agriculture field to the south.” The riverine and riparian habitat associated with the Central Main Canal along the western boundary of the site is suitable for multiple nesting bird species. The New River, which is approximately 0.5 mile west of the Project site, is also suitable habitat for multiple nesting bird species. Vegetation on the Project site itself and in nearby open areas and agricultural fields may also provide suitable nesting and foraging habitat. Agricultural fields in the Imperial Valley of California provide valuable habitat for many resident and migratory birds and are an important component of the Salton Sea ecosystem (Patten et al. 2003). In addition, ground nesting species, such as lesser nighthawk (*Chordeiles acutipennis*), black-necked stilt (*Himantopus mexicanus*), or killdeer (*Charadrius vociferus*), could use the area. Nesting bird species (see COMMENT #2: Assessment of Biological Resources) have the potential to be directly or indirectly impacted by the proposed Project activities.

CDFW is concerned about the impacts to nesting birds including loss of nesting/foraging habitat and potential take from ground-disturbing activities and construction. Conducting work outside the peak nesting season is an important avoidance and minimization measure. CDFW also recommends the completion of

nesting bird surveys *regardless* of the time of year to ensure that impacts to nesting birds are avoided. The timing of the nesting season varies greatly depending on several factors, such as bird species, weather conditions in any given year, and long-term climate changes (e.g., drought, warming, etc.). In response to warming, birds have been reported to breed earlier, thereby reducing temperatures that nests are exposed to during breeding and tracking shifts in availability of resources (Socolar et al., 2017). CDFW staff have observed that climate change conditions may result in nesting bird season occurring earlier and later in the year than historical nesting season dates. CDFW recommends that disturbance of occupied nests of migratory birds and raptors within the Project site and surrounding area be avoided any time birds are nesting onsite. CDFW therefore recommends the completion of nesting bird surveys *regardless of the time of year* to ensure compliance with all applicable laws pertaining to nesting and migratory birds.

Evidence impact would be significant: It is the Project proponent's responsibility to comply with all applicable laws related to nesting birds and birds of prey. Fish and Game Code sections 3503, 3503.5, and 3513 afford protective measures as follows: section 3503 states that it is unlawful to take, possess, or needlessly destroy the nest or eggs of any bird, except as otherwise provided by Fish and Game Code or any regulation made pursuant thereto. Fish and Game Code section 3503.5 makes it unlawful to take, possess, or destroy any birds in the orders Falconiformes or Strigiformes (birds-of-prey) or to take, possess, or destroy the nest or eggs of any such bird except as otherwise provided by Fish and Game Code or any regulation adopted pursuant thereto. Fish and Game Code section 3513 makes it unlawful to take or possess any migratory nongame bird except as provided by rules and regulations adopted by the Secretary of the Interior under provisions of the Migratory Bird Treaty Act of 1918, as amended (16 U.S.C. § 703 et seq.).

Recommended Potentially Feasible Mitigation Measure: CDFW recommends the County add the following measure for nesting birds in a revised MND to ensure that impacts to nesting birds are reduced to less than significant:

MM BIO-[B]: Nesting Birds

Regardless of the time of year, nesting bird surveys shall be performed by a qualified avian biologist no more than 3 days prior to vegetation removal or ground-disturbing activities for all phases of Project construction. Preconstruction surveys shall focus on both direct and indirect evidence of nesting, including nest locations and nesting behavior. The qualified avian biologist will make every effort to avoid potential nest predation as a result of survey and monitoring efforts. If active nests are found during the pre-construction nesting bird surveys, a qualified biologist shall establish an appropriate nest buffer to be marked on the ground. Nest buffers are species specific and shall be at least 300 feet for passerines and 500 feet for raptors. A smaller or larger buffer may be determined by the qualified biologist familiar with the nesting phenology of the nesting species and based on nest and buffer monitoring results. Construction activities may not occur inside the established buffers, which shall remain on site until a qualified biologist determines the young have fledged or the nest is no longer active. Active nests and adequacy of the established buffer distance shall be monitored daily by the qualified biologist until the qualified biologist has determined the young have fledged or the Project has been completed. The qualified biologist has the authority to stop work if nesting pairs exhibit signs of disturbance.

COMMENT #4: Burrowing Owl

IS/ND Document, Section #IV, Page #17

Issue: CDFW is concerned that the ND does not sufficiently identify Project impacts to burrowing owl (*Athene cunicularia*) or ensure that impacts are reduced to a level less than significant.

Specific impact: The ND (p. 17) states: “Per the Imperial County General Plan: Conservation and Open Space Element 5 Figure 2, the proposed special event center is located within the Burrowing Owl Species Distribution Model.” CDFW notes that in California, preferred habitat for burrowing owl is generally typified by short, sparse vegetation with few shrubs (Haug et al. 1993), and that burrowing owls may occur in ruderal grassy fields, vacant lots, and pastures if the vegetation structure is suitable and there are useable burrows and foraging habitat in proximity (Gervais et al. 2003). In addition, burrowing owls frequently move into disturbed areas prior to and during construction since they are adapted to highly modified habitats (Chipman et al. 2008; Coulombe 1971). In Imperial Valley, burrowing owls are highly dependent on irrigation canals for nesting habitat (Wilkerson and Siegel 2011). CNDDDB/BIOS report occurrences of burrowing owl less than 2.5 miles from the Project site.

Impacts to burrowing owls from the Project could include take of burrowing owls, their nests, or eggs or destroying nesting, foraging, or over-wintering habitat, thus impacting burrowing owl populations. Impacts can result from grading, earthmoving, burrow blockage, heavy equipment compaction and crushing of burrows, general Project disturbance that has the potential to harass owls at occupied burrows, and other activities. CDFW notes that impacts to burrowing owls could also occur outside of the peak nesting season because burrowing owls may start breeding earlier (in January) and because young owls may still be dependent on the adults until later in the fall. In addition, because some burrowing owls are resident in burrows year-round, impacts to this species could also occur outside of the peak nesting season.

Evidence impact would be significant: Burrowing owl is a California Species of Special Concern, and a petition to list this species as threatened or endangered under the California Endangered Species Act has been submitted to the Fish and Game Commission. Take of individual burrowing owls and their nests is defined by Fish and Game Code section 86, and prohibited by sections 3503, 3503.5, and 3513. Take is defined in Fish and Game Code section 86 as “hunt, pursue, catch, capture or kill, or attempt to hunt, pursue, catch, capture or kill.” Fish and Game Code sections 3503, 3503.5, and 3513 afford protective measures as follows: section 3503 states that it is unlawful to take, possess, or needlessly destroy the nest or eggs of any bird, except as otherwise provided by Fish and Game Code or any regulation made pursuant thereto. Fish and Game Code section 3503.5 makes it unlawful to take, possess, or destroy any birds in the orders Falconiformes or Strigiformes (birds-of-prey) or to take, possess, or destroy the nest or eggs of any such bird except as otherwise provided by Fish and Game Code or any regulation adopted pursuant thereto. Fish and Game Code section 3513 makes it unlawful to take or possess any migratory nongame bird except as provided by rules and regulations adopted by the Secretary of the Interior under provisions of the Migratory Bird Treaty Act of 1918, as amended (16 U.S.C. § 703 et seq.).

Recommended Potentially Feasible Mitigation Measure: CDFW recommends the County add a mitigation measure for burrowing owl in a revised MND with specific avoidance and minimization measures to ensure that impacts to burrowing owls are reduced to less than significant. CDFW recommends that prior to commencing Project activities for all phases of Project construction, focused surveys for burrowing owl be conducted for the entirety of the Project site by a qualified biologist in accordance with the *Staff Report on Burrowing Owl Mitigation* (CDFG 2012 or most recent version). CDFW recommends Imperial County include the following Mitigation Measure in a revised MND:

MM BIO-[C]: Focused and Pre-Construction Surveys for Burrowing Owl

Suitable burrowing owl habitat has been confirmed on the site; therefore, focused burrowing owl surveys shall be conducted by a qualified biologist in accordance with the *Staff Report on Burrowing Owl Mitigation* (2012 or most recent version) prior to vegetation removal or ground-disturbing activities for all phases of Project construction. If burrowing owls are detected during the

focused surveys, the qualified biologist and Project proponent shall begin coordination with CDFW and USFWS immediately, and shall prepare a Burrowing Owl Plan that shall be submitted to CDFW for review and approval prior to commencing Project activities. The Burrowing Owl Plan shall describe proposed avoidance, monitoring, relocation, minimization, and/or mitigation actions. The Burrowing Owl Plan shall include the number and location of occupied burrow sites, acres of burrowing owl habitat that will be impacted, details of site monitoring, and details on proposed buffers and other avoidance measures. If impacts to occupied burrowing owl habitat or burrow cannot be avoided, the Burrowing Owl Plan shall also describe minimization and compensatory mitigation actions that will be implemented. Proposed implementation of burrow exclusion and closure should only be considered as a last resort, after all other options have been evaluated as exclusion is not in itself an avoidance, minimization, or mitigation method and has the possibility to result in take. The Burrowing Owl Plan shall identify compensatory mitigation for the temporary or permanent loss of occupied burrow(s) and habitat consistent with the "Mitigation Impacts" section of the 2012 Staff Report and shall implement CDFW-approved mitigation prior to initiation of Project activities. If impacts to occupied burrows cannot be avoided, information shall be provided regarding adjacent or nearby suitable habitat available to owls. If no suitable habitat is available nearby, details regarding the creation and funding of artificial burrows (numbers, location, and type of burrows) and management activities for relocated owls shall also be included in the Burrowing Owl Plan. The Project proponent shall implement the Burrowing Owl Plan following CDFW and USFWS review and approval.

For all phases of Project construction, preconstruction burrowing owl surveys shall be conducted no less than 14 days prior to the start of Project-related activities and within 24 hours prior to ground disturbance, in accordance with the *Staff Report on Burrowing Owl Mitigation (2012 or most recent version)*. Preconstruction surveys should be repeated when there is a pause in construction of more than 30 days. Preconstruction surveys should be performed by a qualified biologist following the recommendations and guidelines provided in the *Staff Report on Burrowing Owl Mitigation*. If the preconstruction surveys confirm occupied burrowing owl habitat, Project activities shall be immediately halted. The qualified biologist shall coordinate with CDFW and prepare a Burrowing Owl Plan that shall be submitted to CDFW and USFWS for review and approval prior to commencing Project activities.

COMMENT #5: CDFW Lake and Streambed Alteration (LSA) Program

IS/ND Document, Section #IV, Page #17

Issue: The ND does not include mitigation measures to avoid or reduce impacts to streams and their associated resources to a level less than significant.

Specific impact: The ND (p. 17) states: "The Project is bounded by Hwy 86 to the east and Austin Rd and the Central Main Canal on the west and an agriculture field to the south." Depending on how the Project is designed and constructed, it is likely that the Project applicant will need to notify CDFW per Fish and Game Code section 1602. Potential direct and indirect impacts to the canal and associated fish and wildlife resources, such as burrowing owl, resulting from Project construction are subject to notification under Fish and Game Code section 1602.

Evidence impact would be significant: Fish and Game Code section 1602 requires an entity to notify CDFW prior to commencing any activity that may do one or more of the following: substantially divert or obstruct the natural flow of any river, stream, or lake; substantially change or use any material from the bed, channel or bank of any river, stream, or lake; or deposit debris, waste or other materials that could pass into any river, stream or lake. Note that "any river, stream or lake" includes those that are episodic (i.e., those that are dry for periods of time) as well as those that are perennial

(i.e., those that flow year-round). This includes ephemeral streams, desert washes, and watercourses with a subsurface flow. It may also apply to work undertaken within the flood plain of a body of water. Upon receipt of a complete notification, CDFW determines if the proposed Project activities may substantially adversely affect existing fish and wildlife resources and whether a Lake and Streambed Alteration (LSA) Agreement is required. An LSA Agreement includes measures necessary to protect existing fish and wildlife resources. CDFW may suggest ways to modify the Project that would eliminate or reduce harmful impacts to fish and wildlife resources. CDFW's issuance of an LSA Agreement is a "project" subject to CEQA (see Pub. Resources Code § 21065). Early consultation with CDFW is recommended since modification of the proposed Project may be required to avoid or reduce impacts to fish and wildlife resources. To submit a Lake or Streambed Alteration notification, visit: <https://wildlife.ca.gov/Conservation/Environmental-Review/LSA> .

Recommended Potentially Feasible Mitigation Measure: Because of the potential for impacts to resources subject to Fish and Game Code section 1602, CDFW recommends Imperial County include the following additional mitigation measure in a revised MND to ensure that impacts to streams and associated fish and wildlife are reduced to a level less than significant:

MM BIO-[D]: CDFW's Lake and Stream Alteration (LSA) Program

Prior to Project-activities and issuance of any grading permit, the Project Sponsor shall obtain written correspondence from the California Department of Fish and Wildlife (CDFW) stating that notification under section 1602 of the Fish and Game Code is not required for the Project, or the Project Sponsor shall obtain a CDFW-executed Lake and Streambed Alteration Agreement, authorizing impacts to Fish and Game Code section 1602 resources associated with the Project.

COMMENT #6: Artificial Nighttime Light

IS/ND Document, Section #1, Page #15

Issue: The ND does not analyze impacts to biological resources from artificial nighttime lighting and includes no mitigation measures to avoid or reduce impacts to biological resources to a level less than significant.

Specific impact: The proposed Project will result in new sources of artificial nighttime lighting adjacent to riverine/riparian habitat and open agricultural land. The ND (p. 15) states: "The proposed special event center proposes having events at night with ending times varying but no later than 12 am. Lighting for these events would be required but would only be during event times." The ND indicates that lighting will be shielded; however, no further details are provided. Impacts to biological resources resulting from the use of artificial nighttime lighting during construction and during operation of the Project are not analyzed, and no mitigation measures are proposed. Designs for lighting to be used during operation of the Project should be included in a revised MND, along with details of artificial nighttime lighting to be used during construction. The direct and indirect impacts of artificial nighttime lighting on biological resources including migratory birds that fly at night, bats, and other nocturnal and crepuscular wildlife should be analyzed, and appropriate avoidance and minimization measures to reduce impacts to less than significant should be included in a revised MND.

Evidence impact would be significant: There is riverine/riparian habitat within the Project site and immediately west of the Project site—areas that provide suitable nesting, roosting, foraging, and refugia habitat for birds, migratory birds that fly at night, bats, and other nocturnal and crepuscular wildlife. In addition, the Project is surrounded by agricultural land that may also support wildlife. Artificial nighttime lighting often results in light pollution, which has the potential to significantly and adversely affect fish and wildlife. Artificial lighting alters ecological processes including, but not limited to, the temporal niches of species; the repair and recovery of physiological function; the

measurement of time through interference with the detection of circadian and lunar and seasonal cycles; the detection of resources and natural enemies; and navigation (Gatson et al. 2013). Many species use photoperiod cues for communication (e.g., bird song; Miller 2006), determining when to begin foraging (Stone et al. 2009), behavior thermoregulation (Beiswenger 1977), and migration (Longcore and Rich 2004). Phototaxis, a phenomenon which results in attraction and movement towards light, can disorient, entrap, and temporarily blind wildlife species that experience it (Longcore and Rich 2004).

Recommended Potentially Feasible Mitigation Measure: Because of the potential for artificial nighttime light to negatively impact wildlife, CDFW recommends a revised MND include details of the use of artificial nighttime lighting proposed for construction and operation of the Project and an analysis of impacts to biological resources, as well as specific avoidance and minimization measures to ensure that impacts to wildlife are reduced to less than significant. CDFW recommends Imperial County include the following mitigation measure in a revised MND:

MM BIO-[E]: Artificial Nighttime Light

During Project construction and the lifetime operations of the Project, the County and Project proponent shall eliminate all nonessential lighting throughout the Project area and avoid or limit the use of artificial light at night during the hours of dawn and dusk when many wildlife species are most active. The County and Project proponent shall ensure that lighting for Project activities is shielded, cast downward and directed away from surrounding open-space and agricultural areas, reduced in intensity to the greatest extent possible, and does not result in lighting trespass including glare into surrounding areas or upward into the night sky (see the International Dark-Sky Association standards at <http://darksky.org/>). The County and Project proponent shall ensure use of LED lighting with a correlated color temperature of 3,000 Kelvins or less, proper disposal of hazardous waste, and recycling of lighting that contains toxic compounds with a qualified recycler.

COMMENT #7: Construction Noise

IS/ND Document, Section #XIII, Page #23

Issue: The ND does not include an assessment of the impacts of construction noise on biological resources. Additionally, the ND does not include mitigation measures to avoid or reduce impacts to biological resources from construction noise to a level less than significant.

Specific impact: The ND (p. 23) states that “the conditional acceptable decimal level is 75 decibels from the property line in the A-2 zone,” and that “ground-borne vibration or ground-borne noise levels may be expected from music and traffic during events and temporarily during the improvements to the southern entrance/exit onto Hwy 86.” CDFW is concerned that the ND does not acknowledge or assess the impacts to biological resources that have potential to occur due to construction noise. Direct and indirect impacts may occur to nesting birds and other wildlife using riverine/riparian habitat within and near the Project site and agricultural land in proximity to the Project site.

Evidence impact would be significant: Construction may result in substantial noise through road use, equipment, and other Project-related activities. This may adversely affect wildlife species in several ways as wildlife responses to noise can occur at exposure levels of only 55 to 60 dB (Barber et al. 2009). Anthropogenic noise can disrupt the communication of many wildlife species including frogs, birds, and bats (Sun and Narins 2005, Patricelli and Blickley 2006, Gillam and McCracken 2007, Slabbekoorn and Ripmeester 2008). Noise can also affect predator-prey relationships as many nocturnal animals such as bats and owls primarily use auditory cues (i.e., hearing) to hunt. Additionally, many prey species increase their vigilance behavior

when exposed to noise because they need to rely more on visual detection of predators when auditory cues may be masked by noise (Rabin et al. 2006, Quinn et al. 2017). Noise has also been shown to reduce the density of nesting birds (Francis et al. 2009) and cause increased stress that results in decreased immune responses (Kight and Swaddle 2011).

Recommended Potentially Feasible Mitigation Measure: Because of the potential for construction noise to negatively impact wildlife, CDFW recommends a revised MND include a noise impact assessment and an analysis of impacts to biological resources accompanied by specific avoidance and minimization measures to ensure that impacts to wildlife are avoided or reduced to less than significant. CDFW recommends adding the following mitigation measure to a revised MND:

MM BIO-[F]: Construction Noise

During all Project construction, the County shall restrict use of equipment to hours least likely to disrupt wildlife (e.g., not at night or in early morning) and restrict use of generators except for temporary use in emergencies. Power to sites can be provided by solar PV (photovoltaic) systems, cogeneration systems (natural gas generator), small micro-hydroelectric systems, or small wind turbine systems. The County shall ensure the use of noise suppression devices such as mufflers or enclosures for generators. Sounds generated from any means must be below the 55-60 dB range within 50-feet from the source.

COMMENT #8: Landscaping

IS/ND Document, Section Project Summary, Page #11

Issue: The IS/ND indicates that nonnative bermudagrass (*Cynodon dactylon*) will be used to cover the Project site.

Specific impact: The ND (p. 11) states: “The project site will be fully covered with Bermuda grass to control fugitive dust due to foot and vehicle traffic.” Bermudagrass can be an invasive weed and also requires irrigation. CDFW recommends landscaping with locally native California plants.

Recommendations: To ameliorate the water demands of this Project, CDFW recommends incorporation of water-wise concepts in any Project landscape design plans. In particular, CDFW recommends xeriscaping with locally native California species and installing water-efficient and targeted irrigation systems (such as drip irrigation). Native plants support butterflies, birds, reptiles, amphibians, small mammals, bees, and other pollinators that evolved with those plants, more information on native plants suitable for the Project location and nearby nurseries is available at CALSCAPE: <https://calscape.org/>. Local water agencies/districts and resource conservation districts in your area may be able to provide information on plant nurseries that carry locally native species, and some facilities display drought-tolerant locally native species demonstration gardens. Information on drought-tolerant landscaping and water-efficient irrigation systems is available on California’s Save our Water website: <https://saveourwater.com/>.

ENVIRONMENTAL DATA

CEQA requires that information developed in environmental impact reports and negative declarations be incorporated into a database which may be used to make subsequent or supplemental environmental determinations. (Pub. Resources Code, § 21003, subd. (e).) Accordingly, please report any special status species and natural communities detected during Project surveys to the California Natural Diversity Database (CNDDDB). The CNDDDB field survey form can be filled out and submitted online at the following link: <https://wildlife.ca.gov/Data/CNDDDB/Submitting-Data>. The types of information reported to

CNDDDB can be found at the following link: <https://www.wildlife.ca.gov/Data/CNDDDB/Plants-and-Animals>.

ENVIRONMENTAL DOCUMENT FILING FEES

The Project, as proposed, would have an impact on fish and/or wildlife, and assessment of environmental document filing fees is necessary. Fees are payable upon filing of the Notice of Determination by the Lead Agency and serve to help defray the cost of environmental review by CDFW. Payment of the environmental document filing fee is required in order for the underlying project approval to be operative, vested, and final. (Cal. Code Regs, tit. 14, § 753.5; Fish & G. Code, § 711.4; Pub. Resources Code, § 21089.)

CONCLUSION

CDFW appreciates the opportunity to comment on the ND to assist Imperial County in identifying and mitigating Project impacts on biological resources. CDFW concludes that an ND is inappropriate for the Grand Vista Event Center Project because it does not adequately identify or mitigate the Project's significant, or potentially significant, impacts to biological resources. CDFW also concludes that the ND lacks sufficient information for a meaningful review of impacts to biological resources, including a complete Project description and a complete assessment of biological resources. The CEQA Guidelines indicate that recirculation is required when a new significant effect is identified and additional mitigation measures are necessary (§ 15073.5). CDFW recommends that a revised MND, including a complete Project description and a complete assessment of biological resources, be recirculated for public comment. CDFW also recommends that revised and additional mitigation measures and analysis as described in this letter be added to a revised MND.

Questions regarding this letter or further coordination should be directed to Julia Charpek, Environmental Scientist, at 909.354.0937 or Julia.Charpek@wildlife.ca.gov.

Sincerely,

DocuSigned by:

Attachment 1: Mitigation Monitoring and Reporting Program (MMRP) for Biological Resources

Mitigation Measure (MM) Description	Implementation Schedule	Responsible Parties
<p>Mitigation Measure BIO-[A]: Assessment of Biological Resources Prior to Project construction activities, a complete and recent inventory of rare, threatened, endangered, and other sensitive species located within the Project footprint and within off-site areas with the potential to be affected, including California Species of Special Concern (CSSC) and California Fully Protected Species (Fish and Game Code § 3511), will be completed. Species to be addressed should include all those which meet the CEQA definition (CEQA Guidelines § 15380). The inventory should address seasonal variations in use of the Project area and should not be limited to resident species. Focused species-specific surveys, completed by a qualified biologist and conducted at the appropriate time of year and time of day when the sensitive species are active or otherwise identifiable are required. Acceptable species-specific survey procedures should be developed in consultation with CDFW and the U.S. Fish and Wildlife Service, where necessary. Note that CDFW generally considers biological field assessments for wildlife to be valid for a one-year period, and assessments for rare plants may be considered valid for a period of up to three years. Some aspects of the proposed Project may warrant periodic updated surveys for certain sensitive taxa, particularly if the Project is proposed to occur over a protracted time frame, or in phases, or if surveys are completed during periods of drought.</p>	<p>Prior to Project construction activities</p>	<p>Imperial County</p>
<p>MM BIO-[B]: Nesting Birds Regardless of the time of year, nesting bird surveys shall be performed by a qualified avian biologist no more than 3 days prior to vegetation removal or ground-disturbing activities for all phases of Project construction. Preconstruction surveys shall focus on both direct and indirect evidence of nesting, including nest locations and nesting behavior. The qualified avian biologist will make every effort to avoid potential nest predation as a result of survey and monitoring efforts. If active nests are found during the pre-construction nesting bird surveys, a qualified biologist shall establish an appropriate nest buffer to be marked on the ground. Nest buffers are species specific and shall be at least 300 feet for passerines and 500 feet for raptors. A smaller or larger buffer may be determined by the qualified biologist familiar with the nesting phenology of the nesting species and based on nest and buffer monitoring results. Construction activities may not occur inside the established buffers, which shall remain on site until a qualified biologist determines the young have fledged or the nest is no longer active. Active nests and adequacy of the established buffer distance shall be monitored daily by the qualified biologist until the qualified biologist has determined the young have fledged or the Project has been completed. The qualified biologist has the authority to stop work if nesting pairs exhibit signs of disturbance.</p>	<p>No more than 3 days prior to vegetation clearing or ground-disturbing activities</p>	<p>Imperial County</p>
<p>MM BIO-[C]: Focused and Pre-Construction Surveys for Burrowing Owl Suitable burrowing owl habitat has been confirmed on the site; therefore, focused burrowing owl surveys shall be conducted by a qualified biologist in accordance with the <i>Staff Report on Burrowing Owl Mitigation</i> (2012 or most recent version) prior to vegetation removal or ground-disturbing activities for all phases of Project construction. If burrowing owls are detected during the focused surveys, the qualified biologist and Project proponent shall begin coordination with CDFW and USFWS immediately, and shall prepare a Burrowing Owl Plan that shall be submitted to CDFW for review and approval prior to commencing Project activities. The Burrowing Owl Plan shall describe proposed avoidance, monitoring, relocation, minimization, and/or mitigation actions. The Burrowing Owl Plan shall include the number and location of occupied burrow sites, acres of burrowing owl habitat that will be impacted, details of site monitoring, and details on proposed buffers and other avoidance measures. If impacts to occupied burrowing owl habitat or burrow cannot be avoided, the Burrowing Owl Plan shall also describe minimization and compensatory mitigation actions that will be implemented. Proposed implementation of burrow exclusion and closure should only be considered as a last resort, after all other options have been evaluated as exclusion is not in itself an avoidance, minimization, or mitigation method and has the possibility to result in take. The Burrowing Owl Plan shall identify compensatory mitigation for the temporary or permanent loss of occupied burrow(s) and habitat consistent with the "Mitigation Impacts" section of the 2012 Staff Report and shall implement CDFW-approved mitigation prior to initiation of Project activities. If impacts to occupied burrows cannot be avoided, information shall be provided regarding adjacent or nearby suitable habitat available to owls. If no suitable habitat is available nearby, details regarding the creation and funding of artificial burrows (numbers, location, and type of burrows) and management activities for relocated owls shall also be included in the Burrowing Owl Plan. The Project proponent shall implement the Burrowing Owl Plan following CDFW and USFWS review and approval.</p> <p>For all phases of Project construction, preconstruction burrowing owl surveys shall be conducted no less than 14 days prior to the start of Project-related activities and within 24 hours prior to ground disturbance, in accordance with</p>	<p>Focused surveys: Prior to the start of Project-related activities</p> <p>Preconstruction surveys: No less than 14 days prior to start of Project-related activities and within 24 hours prior to ground disturbance</p>	<p>Imperial County</p>

<p>the <i>Staff Report on Burrowing Owl Mitigation</i> (2012 or most recent version). Preconstruction surveys should be repeated when there is a pause in construction of more than 30 days. Preconstruction surveys should be performed by a qualified biologist following the recommendations and guidelines provided in the <i>Staff Report on Burrowing Owl Mitigation</i>. If the preconstruction surveys confirm occupied burrowing owl habitat, Project activities shall be immediately halted. The qualified biologist shall coordinate with CDFW and prepare a Burrowing Owl Plan that shall be submitted to CDFW and USFWS for review and approval prior to commencing Project activities.</p>		
<p>MM BIO-[D]: CDFW’s Lake and Stream Alteration (LSA) Program Prior to Project-activities and issuance of any grading permit, the Project Sponsor shall obtain written correspondence from the California Department of Fish and Wildlife (CDFW) stating that notification under section 1602 of the Fish and Game Code is not required for the Project, or the Project Sponsor shall obtain a CDFW-executed Lake and Streambed Alteration Agreement, authorizing impacts to Fish and Game Code section 1602 resources associated with the Project.</p>	<p>Prior to Project activities and issuance of any grading permit</p>	<p>Imperial County</p>
<p>MM BIO-[E]: Artificial Nighttime Light During Project construction and the lifetime operations of the Project, the County and Project proponent shall eliminate all nonessential lighting throughout the Project area and avoid or limit the use of artificial light at night during the hours of dawn and dusk when many wildlife species are most active. The County and Project proponent shall ensure that lighting for Project activities is shielded, cast downward and directed away from surrounding open-space and agricultural areas, reduced in intensity to the greatest extent possible, and does not result in lighting trespass including glare into surrounding areas or upward into the night sky (see the International Dark-Sky Association standards at http://darksky.org/). The County and Project proponent shall ensure use of LED lighting with a correlated color temperature of 3,000 Kelvins or less, proper disposal of hazardous waste, and recycling of lighting that contains toxic compounds with a qualified recycler.</p>	<p>Throughout construction and the lifetime operations of the Project</p>	<p>Imperial County</p>
<p>MM BIO-[F]: Construction Noise During all Project construction, the County shall restrict use of equipment to hours least likely to disrupt wildlife (e.g., not at night or in early morning) and restrict use of generators except for temporary use in emergencies. Power to sites can be provided by solar PV (photovoltaic) systems, cogeneration systems (natural gas generator), small micro-hydroelectric systems, or small wind turbine systems. The County shall ensure the use of noise suppression devices such as mufflers or enclosures for generators. Sounds generated from any means must be below the 55-60 dB range within 50-feet from the source.</p>	<p>During all Project construction</p>	<p>Imperial County</p>

EEC ORIGINAL PKG

SUPPLEMENTAL INFORMATION FOR ITEMS 10-14 OF CUP APPLICATION

10. DESCRIBE PROPOSED USE OF THE PROPERTY

Grand Vista Ranch, LLC requests a conditional use permit (CUP) to hold events in an area covering approximately 7 acres. Permittees expect to host year-round events with no more than 59 events per year to include weddings, birthday parties, fundraisers, and other similar private events, in indoor and outdoor facilities.

Requestee will host outdoor only events with shade structures initially to raise funds for proposed barns in the drawings to host future indoor events. Any future buildings will go through the appropriate permitting channels.

Event start times may vary but will end no later than 12 AM. An event schedule will be provided to the Imperial County Planning and Development Services department sixty (60) days prior to the event if requested. The event center may supply tables, tablecloths, chairs, dishes, utensils, decorations, and entertainment as needed. Cleanup for the events will be completed within two (2) days following the event.

An adequate number of trashcans will be provided during events to prevent excess refuse from escaping the event area and affecting neighboring properties. Bermuda grass will span the event area to control fugitive dust due to foot and vehicle traffic. Event occupancy will be restricted to a maximum of 300 people.

11. DESCRIBE CURRENT USE OF THE PROPERTY

The location of the event center is currently unused ag land.

12. DESCRIBE PROPOSED SEWER SYSTEM

Initial events without buildings will utilize portable restrooms for sewer system. Future plans for buildings will obtain properly permitted and sized septic systems prior to building.

13. DESCRIBE PROPOSED WATER SYSTEM

Water system will be fed off a cistern to which water is supplied by the Imperial Irrigation District (IID).

14. DESCRIBE PROPOSED FIRE PROTECTION SYSTEM

Fire extinguishers will be supplied and located as required by local fire codes. Future plan for buildings will obtain proper permitting for fire protection systems prior to building.
